the night the mountain fell is the riveting account of the deadly 7.5 earthquake that struck Hebgen Lake in Yellowstone Park, Montana, on August 17, 1959. Also known as the Yellowstone earthquake, the disaster caused massive flooding and the worst landslide in the history of the northwestern United States.

This is an informative and gripping account of the 1959 Hebgen Lake earthquake, also known as the 1959 Yellowstone earthquake, which struck in southwestern Montana on August 17 at 11:37 PM MST. The earthquake measured 7.3-7.5 on the Richter magnitude scale and caused a huge landslide leaving 28 people dead and causing \$11 million in damage. The slide blocked the flow of the Madison River, resulting in the creation of Quake Lake. Effects of the earthquake were also felt in Idaho and Wyoming. It was the strongest and deadliest earthquake to hit Montana since the 1935-36 Helena earthquakes and caused the worst landslides in the history of the northwestern United States since 1927. With numerous illustrations and color photographs and eyewitness accounts, help to tell the story.

At 11:37 PM on August 17, 1959, a magnitude 7.5 earthquake rocked Montana's Yellowstone country. In an instant, an entire mountainside fractured and thundered down onto the sites of unsuspecting campers. The mammoth avalanche generated hurricane-force winds ahead of it that ripped clothing from backs and heaved tidal waves in both directions of the Madison River canyon. More than two hundred vacationers trapped in the canyon feared the dam upstream would burst as debris and flooding overwhelmed the river. Injured victims frantically searched the darkness for friends and family. Acclaimed historian Larry Morris tells the gripping minute-by-minute saga of the survivors who endured the interminable night, the first responders who risked their lives, and the families who waited days and weeks for word of their missing loved ones. **Book Jacket**
