text presents mathematical and miscellaneous papers the book will be most useful to researchers and practitioners of chemical engineering mathematicians and chemists will also benefit from the text

while it is not difficult to find data in many cases what advice can you get on the quality of the data retrieved chemical information for chemists could help with this problem and more this book is a chemical information book aimed specifically at practicing chemists written and edited by experts in the field it is ideal for chemists who lack a chemical information professional able to teach basic and intermediate techniques in retrieving and evaluating information using the unique entry points of the chemical literature including structure formula substructure and sequence aimed at students on undergraduate and graduate courses it could also be a useful guide to new information specialists who are facing the challenging diversity of chemical literature

in the early twentieth century an elite group of modern minded scientists in germany led by the eminent organic chemist emil fischer set out to create new centers and open new sources of funding for chemical research their efforts led to the establishment in 1911 of the chemical institutes of the kaiser wilhelm society for the advancement of the sciences whose original staff included several future nobel laureates although these institutes were designed to promote free research that would uphold german leadership in international science they also came to promote the integration of science in the german war effort after 1914 according to jeffrey johnson the development of the kaiser wilhelm institutes exemplifies the origins and dilemmas of one of the most significant innovations in modern science the creation of institutions for basic research both theoretical and practical the kaiser wilhelm society was a quasi official institution under the protection of kaiser wilhelm ii but it received most of its funding from german industry rather than the imperial treasury after 1914 however the kaiser s chemists and their institutes provided key support to the german war effort within a few months of the outbreak of world war i the institutes had been integrated into war mobilization activities they conducted research both in weapons such as poison gas and in strategic resources especially synthetics to replace naturally produced goods cut off by britain s blockade of german ports by examining the kaiser wilhelm society in the framework of both scientific and social change johnson is able to answer questions that seem puzzling if not viewed from this dual perspective such as why german chemists pushed for institutional change at this particular time johnson argues that the new institutes arose from a characteristically modern tension between internationally set scientific goals and the competing national priorities of a country headed for war johnson s sources include the papers of emil fischer the archives of several major german corporations including bayer hoechst and krupp government records and the archives of the max planck society which grew out of the kaiser wilhelm society after world war ii
