the author here presents an architectural history of paris stretching from the 3rd century bc up until the end of the 20th century

this book is the first devoted to the important innovations in architecture that took place in western europe between the death of emperor justinian in a d 565 and the tenth century during this period of transition from late antiquity to the middle ages the early christian basilica was transformed in both form and function charles b mcclendon draws on rich documentary evidence and archaeological data to show that the buildings of these three centuries studied in isolation but rarely together set substantial precedents for the future of medieval architecture he looks at buildings of the so called dark ages monuments that reflected a new assimilation of seemingly antithetical barbarian and classical attitudes toward architecture and its decoration and at the grand and innovative architecture of the carolingian empire the great romanesque and gothic churches of subsequent centuries owe far more to the architectural achievements of the early middle ages than has generally been recognized the author argues

this new volume in the avista series focuses on the study of medieval limestone as the principal building material in the middle ages and a prized medium for architectural sculpture limestone played a significant role in medieval artistic manufacture the choice of material inherently informed the final product thus understanding the material and its uses gives insight into the medieval creative process and the production driven choices that were made by masons and sculptors quality limestone was a highly sought after commodity that was often shipped across great distances yet in other instances masons

made do with locally available resources through an intensive study of medium many broader topics can be addressed for instance the economics of medieval construction the artistic process or the application of modern technology in understanding and preserving medieval buildings and sculpture the papers collected in this volume present the depth and scope of recent scholarship in the field through a wide ranging overview of the state of the discipline of medieval stone studies they address such methodological approaches to the study of limestone as the use of neutron activation analysis to determine quarries of origin issues of labor and transportation as well as issues faced in the cleaning and conservation of limestone this volume is the first comprehensive study in english that investigates limestone as an essential component of large scale medieval artistic production and as such it is a valuable resource for both students and scholars in the field

this volume offers unparalleled coverage of all aspects of art and architecture from medieval western europe from the 6th century to the early 16th century drawing upon the expansive scholarship in the celebrated grove dictionary of art and adding hundreds of new entries it offers students researchers and the general public a reliable up to date and convenient resource covering this field of major importance in the development of western history and international art and architecture
