the exploration and colonisation of the pacific is a remarkable episode of human prehistory early sea going explorers had no prior knowledge of pacific geography no documents to record their route no metal no instruments for measuring time and none for exploration forty years of modern archaeology experimental voyages in rafts and computer simulations of voyages have produced an enormous range of literature on this controversial and mysterious subject this book represents a major advance in knowledge of the settlement of the pacific by suggesting that exploration was rapid and purposeful undertaken systematically and that navigation methods progressively improved using an innovative model to establish a detailed theory of navigation geoffrey irwin claims that rather than sailing randomly downwind in search of the unknown pacific islanders expanded settlement by the cautious strategy of exploring upwind so as to ease their safe return the author has tested this hypothesis against the chronological data from archaeological investigation with a computer simulation of demographic and exploration patterns and by sailing throughout the region himself

this comprehensive volume explores in detail the varied experience of native peoples who lived on this land in prehistoric times chapters on each of the regions offer cutting edge research the culmination of years of work by dozens of the most knowledgeable experts

this book provides the most complete overview of the attica region from the neolithic to the end of the late bronze age it paves the way for a new understanding of attica in the early iron age and indirectly throws new light on the origins of what will later become the polis of the athenians

an analytical bibliography that contains 7407 references covering the egyptian prehistory palaeolithic neolithic and predynastic as well as the period of the first two dynasties

the earth is home according to one estimate to some 3 000 million million million million living things but that s just a fraction of those that have existed throughout history vast mountain ranges have risen and been worn away continents have broken up and drifted across the globe only to collide again to form new land masses this book is the story of the earth from its fiery beginning to the arrival of man an introductory chapter focuses on the processes that underlie the development of life on earth each of the following chapters examines a single period of geological time and introduces us to terrific trilobites amazing ammonites dynamic dinosaurs and humble humans throughout are fascinating sidebars and an index glossary and extensive timeline are added as excellent study and research tools to enable the reader to access information in several different ways from the beginning of the universe through the beginnings of life to the arrival of humans the young oxford book of the prehistoric world tells the story of life and death throughout the centuries and how every living thing that is or ever was contributes to the rich and complex world that is the earth today

annual report of the bureau of ethnology to the secretary of the smithsonian institution
