first published in 1989 we clearly know more today about teaching and learning mathematics than we did twenty years ago and we are beginning to see the effects of this new knowledge at the classroom level in particular we can point to several significant sets of studies based on emerging theoretical frameworks to establish such a framework researchers must be provided with the opportunity to exchange and refine their ideas and viewpoints conferences held in georgia and wisconsin during the seventies serve as examples of the role such meetings can play in providing a vehicle for increased communication synthesis summary and cross disciplinary fertilization among researchers working within a specialized area of mathematical learning this monograph holds selected papers from four more recent conferences on research agenda in mathematics education

in recent years funding agencies like the institute of educational sciences and the national science foundation have increasingly emphasized large scale studies with experimental and quasi experimental designs looking for objective truths educational researchers have recently begun to use large scale studies to understand what really works from developing interventions to validation studies of the intervention and then to efficacy studies and the final scale up for large implementation of an intervention moreover modeling student learning developmentally taking into account cohort factors issues of socioeconomics local political context and the presence or absence of interventions requires the use of large data sets wherein these variables can be sampled adequately and inferences made inroads in quantitative methods have been made in the psychometric and sociometric literatures but these methods are not yet common knowledge in the mathematics education community in fact currently there is no volume devoted to discussion of issues related to large scale studies and to report findings from them this volume is unique as it directly discusses methodological issue in large scale studies and reports empirical data from large scale studies

this third edition of craig mertler s practical text helps readers every step of the way as they plan and execute their first educational research project offering balanced coverage of qualitative and quantitative methods an emphasis on ethics and a wealth of new examples and concrete applications the new edition continues to use conversational nontechnical language to help students clearly

understand and apply research concepts principles procedures and terminology expanded coverage of foundations of research an increased focus on integrating qualitative and quantitative research and updated coverage of research questions and the tools of qualitative research bring the book thoroughly up to date while streamlined coverage of statistics shows students how to do quantitative analysis in a straightforward way
