urbanization is next to global warming the largest threat to biodiversity indeed it is becoming increasingly evident that many bird species get locally extinct as a result of urban development however many bird species benefit from urbanization especially through the abundance of human provided resources and increase in abundance and densities these birds are intriguing to study in relation to its resilience and adaption to urban environments but also in relation to its susceptibility and the potential costs of urban life this research topic consisting of 30 articles one review two meta analyzes and 27 original data papers provides insights into species and population responses to urbanization through diverse lenses including biogeography community ecology behaviour life history evolution and physiology

diverse driving forces processes and actors are responsible for different trends in the development of megacities and large urban areas under the dynamics of global change megacities are themselves changing on the one hand they are prone to increasing socio economic vulnerability due to pronounced poverty socio spatial and political fragmentation sometimes with extreme forms of segregation disparities and conflicts on the other hand

megacities offer positive potential for global transformation e g minimisation of space consumption highly effective use of resources efficient disaster prevention and health care options if good strategies were developed at present in many megacities and urban areas of the developing world and the emerging economies the quality of life is eroding most of the megacities have grown to unprecedented size and the pace of urbanisation has far exceeded the growth of the necessary infrastructure and services as a result an increasing number of urban dwellers are left without access to basic amenities like clean drinking water fresh air and safe food additionally social inequalities lead to subsequent and significant intra urban health inequalities and unbalanced disease burdens that can trigger conflict and violence between subpopulations the guiding idea of our book lies in a multi and interdisciplinary approach to the complex topic of megacities and urban health that can only be adequately understood when different disciplines share their knowledge and methodological tools to work together we hope that the book will allow readersto deepen their understanding of the complex dynamics of urban and megacity populations through the lens of public health geographical and other research perspectives

urban life in transition examines the relationships between economic political and sociological effects of urban life suggesting that political cultural and social changes in city affairs do not occur as a direct result of economic restructuring addressing a gap in the literature which neglects complex issues of urban life and governance this book treats urban crime drugs racism and demographic patterns as topics on their own as well as their impact on local govenment from the mayorality to the neighbourhood level

cities and urban life authored by two of the best known textbook writers in the field provides a comprehensive introduction to urban sociology urban anthropology and urban studies primarily sociological in approach this book incorporates historical social psychological geographical and anthropological insights while strong in the classical urban sociology it also gives extensive attention to the new political economy approach to urban studies the text provides an introduction to the city the history of cities and new trends disciplinary perspectives the anatomy of the city and the planning and evaluation of cities for individuals interested in urban sociology urban political economy and urban anthropology
