aircraft of the royal australian air force tells the story of the raaf s first one hundred years
by describing the acquisition operation and service record of the multitude of aircraft
types flown by the raaf the 176 aircraft types include the flimsy wood and canvas aircraft
typical of world war i through the technological advances during and after world war ii to
modern fifth generation complex aircraft like the f 35 lightning ii even before its formation
sir richard williams the father of the raaf had decided to employ an alpha numeric
numbering system to identify and account for each aircraft in service this system started
with a1 a2 a3 etc as each type of aircraft came into service each individual aircraft within
each series was identified as a1 1 a1 2 and so on and the aircraft serial became known
colloquially as the a number with some exceptions over the century since the a number
system started aircraft entered raaf service in broadly the sequence of the a numbers and
so this book is intended to assist in charting the 100 year history of the raaf by listing
aircraft operated in a number sequence rather than by listing them by role such as fighter
bomber maritime trainer transport etc or alphabetically by name or by manufacturer the

inclusion of a comprehensive index and the quick reference guide to aircraft by role is intended to facilitate the location of the entry for any specific type of aircraft for those who may not already know its a number aircraft of the royal australain air force is a must have for all those who have served in the raaf those with a passion for military aviation and aircraft in general and the broader members of the public wishing to gain an appreciation of the royal australain air force in its centenary year
