this book offers an analysis of privacy impacts resulting from and reinforced by technology and discusses fundamental risks and challenges of protecting privacy in the digital age privacy is among the most endangered species in our networked society personal information is processed for various purposes beyond our control ultimately this affects the natural interplay between privacy personal identity and identification this book investigates that interplay from a systemic socio technical perspective by combining research from the social and computer sciences it sheds light on the basic functions of privacy their relation to identity and how they alter with digital identification practices the analysis reveals a general privacy control dilemma of digital identification shaped by several interrelated socio political economic and technical factors uncontrolled increases in the identification modalities inherent to digital technology reinforce this dilemma and benefit surveillance practices thereby complicating the detection of privacy risks and the creation of appropriate safeguards easing this problem requires a novel approach to privacy impact assessment pia and this book proposes an alternative pia framework

which at its core comprises a basic typology of personally and technically identifiable information this approach contributes to the theoretical and practical understanding of privacy impacts and thus to the development of more effective protection standards this book will be of much interest to students and scholars of critical security studies surveillance studies computer and information science science and technology studies and politics

in recent years we have witnessed the mushrooming of pro democracy and protest movements not only in the arab world but also within europe and the americas such movements have ranged from popular upheavals like in tunisia and egypt to the organization of large scale demonstrations against unpopular policies as in spain greece and poland what connects these different events are not only their democratic aspirations but also their innovative forms of communication and organization through online means which are sometimes considered to be outside of the state s control at the same time however it has become more and more apparent that countries are attempting to increase their understanding of and control over their citizens actions in the digital sphere this involves striving to develop surveillance instruments control mechanisms and processes engineered to dominate the digital public sphere which necessitates the assistance and support of private actors such as internet intermediaries examples include the growing use of internet surveillance technology with which online data traffic is analysed and the extensive monitoring of social networks despite increased media attention academic debate on the ambivalence of these technologies mechanisms and techniques remains relatively limited as is discussion of the involvement of corporate actors the purpose of this edited volume is to reflect on how internet related technologies mechanisms and techniques may be used as a means to enable expression but also to restrict speech manipulate public debate and govern global populaces this book was published as a special issue of the journal of information technology and politics

digital communities in a networked society e commerce e business and e government deals with the accelerating evolution in the computerization of society this evolution or should we call it a revolution is dominantly driven by the internet and documented by the novelties introduced year by year by information and communication technologies the book contains recent results of research and development in the areas of e government business models of e applications innovative structures in the internet auctions and e payment future aspects of communication internet and the web advanced platforms and grid computing cooperation and integration modeling and construction of e services

in her innovative study of human rights discourse lena khor takes up the prevailing concern by scholars who charge that the globalization of human rights discourse is becoming yet another form of cultural legal and political imperialism imposed from above by an international human rights regime based in the global north to counter these charges she argues for a paradigmatic shift away from human rights as a hegemonic immutable and ill defined entity toward one that recognizes human rights as a social construct comprised of language and of language use she proposes a new theoretical framework based on a global discourse network of human rights supporting her model with case studies that examine the words and actions of witnesses to genocide paul rusesabagina and humanitarian organizations doctors without borders she also analyzes the language of texts such as michael ondaatje s anil s ghost khor s idea of a globally networked structure of human rights discourse enables actors textual and human who tap into or are linked into this rapidly globalizing system of networks to increase their power as speaking subjects and in so doing to influence the range of acceptable meanings and practices of human rights in the cultural sphere khor s book is a unique and important contribution to the study of human rights in the humanities that revitalizes viable notions of agency and liberatory network power in fields that have been dominated by negative visions of human capacity and moral action

introduction to the principles and practices underlying state of the art applications in this emerging field
