the publication deals with a general approach to the safe management of the operating lifetimes of nuclear power plants which requires a continuing quest for excellence it also responds to the concerns about maintaining adequate safety levels at ageing plants even beyond their design lifetimes

provides guidance on the development content and use of operational limits and conditions and operating procedures that affect them this publication recommends how to meet the requirements established in safety standards series no ns r 2 safety of nuclear power plants operation

the general concern about the state of the environment has focused the attention of many countries in recent years on the need to remediate areas affected by radioactive residues the present assessment was requested by the government of the republic of the marshall islands with the purpose of obtaining an independent view of the radiological situation on bikini atoll the site of nuclear weapons testing in the period 1946 1958 in particular questions were posed about whether the former inhabitants should be permitted to return to their homes and about the nature and extent of any remedial actions which might be necessary this report presents the results and conclusions of a meeting of international experts convened by the iaea and chaired by k lokan australia in december 1995 to review the available information on the subject

this report is based on information presented at two iaea technical committee meetings held within the framework of the iaea project on operational safety guidance in 1993 and 1994 the document was prepared to provide guidance to member states in assessing the status of equipment qualification eq in operational nuclear power plants and in preserving this status it offers methods and practices for activities which are necessary for a successful implementation of periodical safety reviews the report should be of value for all countries that are parties to the convention on nuclear safety which entered into force on 24 october 1996 and stipulates the review and where necessary the upgrading of the safety of existing nuclear installations

the main purpose of this report is to assist physicians involved in the early medical handling of radiation victims to apply prompt diagnostic measures and emergency treatment special emphasis is given to localized radiation injuries which are the most frequently occurring direct health effects observed from ionizing radiation the lessons learned from the accidents at chernobyl ukraine 1986 goiânia brazil 1987 san salvador el salvador 1989 soeq israel 1990 and nesvizh belarus 1991 on the early medical handling of radiation injuries have been incorporated into this report

this is the first iaea publication dealing specifically with the decommissioning of non reactor nuclear facilities it applies particularly to the nuclear fuel cycle including uranium conversion enrichment and fuel fabrication facilities reprocessing plants and waste spent fuel storage and treatment facilities but also includes analytical and research laboratories it highlights distinctive factors in the decommissioning of non reactor nuclear facilities as compared to those for reactors and offers results from past ongoing and planned decommissioning activities

this report presents the findings of a study of the current radiological conditions at the former nuclear test site at semipalatinsk kazakhstan conducted by a team of international experts under the auspices of the iaea at the request of the government of kazakhstan the objectives of the study were to assess the current and potential future radiation doses to the residents of the semipalatinsk nuclear test site area and adjacent settlements to advise on remedial action where appropriate and to recommend whether further radiological evaluation of the area is warranted

this safety report updates iaea safety series no 39 safe handling of plutonium 1974 and provides an overview of modern practices for handling and storing separated plutonium it provides descriptions of plutonium and its properties and of the biological effects on humans of plutonium the principles underlying the safe design and operation of plutonium handling storage facilities and the licensing of such facilities are also covered
