in developing countries traditional fermentation serves many purposes it can improve the taste of an otherwise bland food enhance the digestibility of a food that is difficult to assimilate preserve food from degradation by noxious organisms and increase nutritional value through the synthesis of essential amino acids and vitamins although fermented food has a vaguely distasteful ring bread wine cheese and yogurt are all familiar fermented foods less familiar are gari ogi idli ugba and other relatively unstudied but important foods in some african and asian countries this book reports on current research to improve the safety and nutrition of these foods through an elucidation of the microorganisms and mechanisms involved in their production also included are recommendations for needed research

for decades ngos targeting world hunger focused on ensuring that adequate quantities of food were being sent to those in need in the 1990s the international food policy community turned its focus to the hidden hunger of micronutrient

deficiencies a problem that resulted in two scientific solutions fortification the addition of nutrients to processed foods and biofortification the modification of crops to produce more nutritious yields this hidden hunger was presented as a scientific problem to be solved by experts and scientifically engineered smart foods rather than through local knowledge which was deemed unscientific and hence irrelevant in hidden hunger aya hirata kimura explores this recent emphasis on micronutrients and smart foods within the international development community and in particular how the voices of women were silenced despite their expertise in food purchasing and preparation kimura grounds her analysis in case studies of attempts to enrich and market three basic foods rice wheat flour and baby food in indonesia she shows the power of nutritionism and how its technical focus enhanced the power of corporations as a government partner while restricting public participation in the making of policy for public health and food she also analyzes the role of advertising to promote fortified foodstuffs and traces the history of golden rice a crop genetically engineered to alleviate vitamin a deficiencies situating the recent turn to smart food in indonesia and elsewhere as part of a long history of technical attempts to solve the third world food problem kimura deftly analyzes the intersection of scientific expertise market forces and gendered knowledge to illuminate how hidden hunger ultimately defined women as victims rather than as active agents
