explorations in developmental biology is a revolutionary departure from time honored introductory texts the book is based on the premise that the substance concepts and excitement of contemporary developmental biology are best communicated to students by using the same form in which they were first communicated to the scientific community original research reports but a simple collection of original papers is not sufficient it is too limited in scope and too disjointed and students are not prepared to read them with understanding in this book designed to serve as the principal text for a first or second course in developmental biology basic concepts are presented in a series of 22 chapters that focus on major often unsolved problems ranging from self assembly to embryonic induction to cellular

the migration of labor from rural to urban areas is an important part of the urbanization process in developing countries even though it has been the focus of abundant research over the past five decades some key policy questions have not found clear answers yet to what extent is internal migration a desirable phenomenon and under what circumstances should governments intervene and if so with what types of interventions what should be their policy objectives to shed light on these important issues the authors survey the existing theoretical models and their conflicting policy implications and discuss the policies that may be justified based on recent relevant empirical studies a key limitation is that much of the empirical literature does not provide structural tests of the theoretical models but

only provides partial findings that can support or invalidate intuitions and in that sense support or invalidate the policy implications of the models the authors broad assessment of the literature is that migration can be beneficial or at least be turned into a beneficial phenomenon so that in general migration restrictions are not desirable they also identify some data issues and research topics which merit further investigation world bank web site
