this book offers a deep look into the latest research tools implementations frameworks architectures and case studies within the field of business intelligence management provided by publisher

over the years i have worked with or consulted for many managers throughout the world at all levels of industry and government i have seen who succeeded achieved goals and made progress and who failed or crashed i have studied their methods of operation and their decision making approach as well as the range of people involved in the decision making i similarly personally managed large industrial and service organizations and their operations and found that to succeed and have a content team of collaborators decision making had to be joint and delegated to the lowest competent and informed level using this approach not only improved the performance of the organization or firm but also resulted in a more content professional cooperative happy and competent workforce in general people like to assume responsibility particularly of functions with which they are intimately familiar they enjoy the role of decision maker and the use of their knowledge and experience in guiding their and related work delegation of decision making not only infuses pride and contentment but also assures more informed timely and effective implementation of decisions it also adds to worker training and education as workers inquire develop information and use of their own experience in improving their decision making worker pride and feeling of control and involvement lead to contentment and satisfaction which in return pays dividends in worker productivity morale retention and resulting low turnover

in 1985 it was 20 years since nobel laureate herbert a simon published the shape of automation for men and management this short but important and still topical book dwells on three subjects the long range economic effects of automation will the corporation be managed by machines the new science of management decision in contrast with george orwell who was a critic of contemporary political systems rather than a prophet simon portrays a far more rosy picture of our brave new world simon's work breathes optimism first computer technology looking back it is doubtful whether even the professor expected the hardware development we have witnessed secondly our ability to tame the beast there is now not much reason for complacency and

satisfaction offices and factories can by no means be called automated at most semi automated thirdly the organizational and social implications of these rapid technological developments referring to what he then called the computer and the new decision making techniques concerning this last point there is little need to emphasize that had been less practical application in organizations than the often impressive theoretical developments would lead one to believe in europe this situation is even more accute than in the usa and japan the esprit programme of the ecc and many similar national programs intend to bridge the gap

fundamentals of marketing research covers all facets of marketing research including method technique and analysis at all levels the methodological scope regarding research design data collection techniques and measurement is broad with three chapters devoted to the critical area of measurement and scaling the presentation is from primarily a pragmatic and user oriented perspective which aides the student to evaluate the research presented to them this text explores cutting edge technologies and new horizons while ensuring students have a thorough grasp of research fundamentals
