the problem with expertise and the dark side of the equation knowledge power experts are not infallible treating them as such has done us all a grave disservice and as the weaponization of expertise makes painfully clear given rise to the very populism that all knowing experts and their elite coterie decry jacob hale russell and dennis patterson use the devastating example of the covid 19 pandemic to illustrate their case revealing how the hubris of all too human experts undermined perhaps irreparably public faith in elite policymaking paradoxically by turning science into dogmatism the overweening elite response has also proved deeply corrosive to expertise itself in effect doing exactly what elite policymakers accuse their critics of doing a much needed corrective to a dangerous blind faith in expertise the weaponization of expertise identifies a cluster of pathologies that have enveloped many institutions meant to help referee expert knowledge in particular a disavowal of the doubt uncertainty and counterarguments that are crucial to the accumulation of knowledge at a time when trust in expertise and faith in institutions are most needed and most lacking this work issues a stark reminder that a crisis of misinformation may well begin at the top

which poses a greater threat a gun or a swimming pool why do drug dealers still live with their mothers what connects real estate agents and the ku klux klan these aren't the questions you'd expect from an economist but steven d levitt isn't your typical economist he's a celebrated scholar who investigates the puzzles of ordinary life cheating crime sports parenting and reaches conclusions that upend what we think we know freakonomics represents a groundbreaking partnership between levitt and stephen j dubner an award winning journalist and author some questions explored here involve life and death stakes while others embrace their admittedly peculiar nature together they define a new discipline freakonomics through compelling narratives and sharp wit levitt and dubner demonstrate that economics fundamentally examines incentives how people obtain what they want or need particularly when others are competing for the same resources in freakonomics they reveal the concealed mechanics of everything around us how crack gangs operate internally the realities behind campaign finance the revealing patterns of teacher cheating what connects these diverse stories is a conviction that our complex often deceptive modern world remains penetrable and knowable and becomes even more fascinating when we ask the right questions all that's required is a fresh perspective freakonomics establishes an unconventional framework if morality describes how we wish the world functioned economics reveals how it actually operates while readers will certainly collect enough intriguing anecdotes to fuel countless conversations this book offers something far more valuable it fundamentally transforms how you perceive the modern world this revised and expanded edition includes bonus content selected freakonomics columns from the new york times magazine a conversation between steven levitt stephen dubner and angela duckworth plus the original new

new york times magazine profile dubner wrote about levitt that launched their collaboration

asking provocative and profound questions about human motivation and contemporary living and reaching some astonishing conclusions freakonomics will make you see the familiar world through a completely original lens

these may not sound like typical questions for an economist to ask but steven d levitt is not a typical economist he studies the riddles of everyday life from cheating and crime to parenting and sports and reaches conclusions that turn conventional wisdom on its head freakonomics is a groundbreaking collaboration between levitt and stephen j dubner an award winning author and journalist they set out to explore the inner workings of a crack gang the truth about real estate agents the secrets of the ku klux klan and much more through forceful storytelling and wry insight they show that economics is at root the study of incentives how people get what they want or need especially when other people want or need the same thing book jacket

economics is not widely considered to be one of the sexier sciences the annual nobel prize winner in that field never receives as much publicity as his or her compatriots in peace literature or physics but if such slights are based on the notion that economics is dull or that economists are concerned only with finance itself steven d levitt will change some minds in freakonomics written with stephen j dubner levitt argues that many apparent mysteries of everyday life don t need to be so mysterious they could be illuminated and made even more fascinating by asking the right questions and drawing connections for example levitt traces the drop in violent crime rates to a drop in violent criminals and digging further to the roe v wade decision that preempted the existence of some people who would be born to poverty and hardship elsewhere by analyzing data gathered from inner city chicago drug dealing gangs levitt outlines a corporate structure much like mcdonald s where the top bosses make great money while scores of underlings make something below minimum wage and in a section that may alarm or relieve worried parents levitt argues that parenting methods don t really matter much and that a backyard swimming pool is much more dangerous than a gun these enlightening chapters are separated by effusive passages from dubner s 2003 profile of levitt in the new york times magazine which led to the book being written in a book filled with bold logic such back patting veers freakonomics however briefly away from what levitt actually has to say although

maybe there's a good economic reason for that too and we're just not getting it yet

the New York Times best-selling *Freakonomics* was a worldwide sensation selling over four million copies in thirty-five languages and changing the way we look at the world. Now Steven D. Levitt and Stephen J. Dubner return with *Superfreakonomics* and fans and newcomers alike will find that the sequel is even bolder, funnier, and more surprising than the first. Four years in the making, *Superfreakonomics* asks not only the tough questions but the unexpected ones: What's more dangerous, driving drunk or walking drunk? Why is chemotherapy prescribed so often if it's so ineffective? Can a sex change boost your salary? *Superfreakonomics* challenges the way we think all over again, exploring the hidden side of everything with such questions as: How is a street prostitute like a department store Santa? Why are doctors so bad at washing their hands? How much good do car seats do? What's the best way to catch a terrorist? Did TV cause a rise in crime? What do hurricanes, heart attacks, and highway deaths have in common? Are people hard-wired for altruism or selfishness? Can eating kangaroo save the planet? Which adds more value, a pimp or a realtor? Levitt and Dubner mix smart thinking and great storytelling like no one else. Whether investigating a solution to global warming or explaining why the price of oral sex has fallen so drastically, by examining how people respond to incentives, they show the world for what it really is: good, bad, ugly. And in the final analysis, *Superfreakonomics* has been imitated many times over, but only now with *Superfreakonomics* has it met its match.

The study of economics can be wilder than you think. Have you ever wondered why we make the money mistakes that we do with such a wealth of financial advice available? It seems stunning that we could make such bad investments or foolhardy purchases. *Freakonomics* uses the principles of economic analysis to unpack this concept for us and explain why we make the choices we do. And through Levitt and Dubner's critical study, you'll learn the surprising truth about how we can apply economics to every facet of our lives, from dating to big purchases.
