this book brings a broad holistic approach to the study of the phenomena of the global sikh community referred to collectively as the panth with contributions by an interdisciplinary range of experts the volume provides insight into current debates and discussions around sikh identity in the twenty first century it examines the terms sikh sikhism and sikhi and considers how those outside of the margins fit into larger definitions of the wider panth both the secular and religious dimensions of being a sikh are explored and lived experience is a central theme throughout the chapters engage with issues of authority and diversity as well as representation as sikhs become increasingly settled and active within their diasporic locales the book includes a variety of case studies and makes a valuable contribution to the growing field of sikh studies

despite the centrality of this group to modern sikhism scholarship on the panj piare has remained sparse louis fenech s new book examines the khalsa and the role that the panj piare have had in the development of the sikh faith over the past three centuries

the immune system is the only organ system in the body besides the central nervous systems endowed with memory both types of memories are specific and long lasting sometimes life long this memory capacity of the immune system provides the basis for the most cost efficient of all medical interventions successful vaccinations against many common infectious diseases such a success requires the isolation of the infectious agent or toxic substance methods to grow and or purify the relevant antigen and change it into something innocuous whilst maintaining its immunogenicity whereas the early vaccines could only use the enhanced resistance against infectious disease as a measure of vaccine efficacy most modern vaccines rely upon standardized laboratory tests accepted to parallel the in vivo protective capacity to confirm the quality and potency of the respective vaccine we are presently experiencing an explosion in the development of new and or improved vaccines this is largely due to a parallel rapid expansion in our knowledge of the immune system and of the detailed molecular structure and function of microorganisms using this knowledge it is now possible to compose vaccines of new types where only certain molecules or parts of molecules derived from a pathogen are included excluding other potentially harmful ones whereas earlier attenuated live vaccines were created by empirical means such vaccines can now be created by molecularly defined interventions in the genome of the microorganism
