experts are predicting that demand for marine fish oil will soon outstrip supply creating
extreme urgency within the global aquafeed industry to find viable alternatives fish oil
replacement and alternative lipid sources in aquaculture feeds is the first comprehensive
review of this multifaceted complex issue it also addresses the crucial quest

this volume with contributions from a team of multi disciplinary team experts addresses the
economic sustainability and clean manufacturing methods to deal with the challenges that
water scarcity and water quality are imposing on many countries particularly on
mediterranean arid areas that are threatening their economic and social development water
plays a crucial role in industry agriculture and daily life its use has increased ten fold between
1900 and 2000 on a global scale about 70 of clean water from available sources is used for
agricultural purposes primarily irrigation the rest of it being used for domestic and industrial

purposes with the actual demographic and economic trends it is expected that by 2025 two thirds of the world population will live in water stressed areas and it is expected a 40 increase in water consumption

a comprehensive and detailed reference guide on the integrity and safety of oil and gas pipelines both onshore and offshore covers a wide variety of topics including design pipe manufacture pipeline welding human factors residual stresses mechanical damage fracture and corrosion protection inspection and monitoring pipeline cleaning direct assessment repair risk management and abandonment links modern and vintage practices to help integrity engineers better understand their system and apply up to date technology to older infrastructure includes case histories with examples of solutions to complex problems related to pipeline integrity includes chapters on stress based and strain based design the latter being a novel type of design that has only recently been investigated by designer firms and regulators provides information to help those who are responsible to establish procedures for ensuring pipeline integrity and safety
