master s thesis from the year 2013 in the subject geography earth science cartography geographic information science and geodesy sheffield hallam university sheffield hallam university language english abstract monitoring urban land use cover changes provide spatio temporal information on the pattern and the amount of the changes that has taken place across the land use cover classes and the information obtained from the urban expansion are valuable for sustainable planning and management of urban resources remote sensing techniques provide fast and effective means for classifying and mapping urban land cove use change through examining spectra characteristics of multi dates satellite images in recent years kurdistan region cities have witnessed a rapid growth of the urban rates due to previous socio economic and political variations in the area the purpose of the study is to analyse and visualize spatial pattern of urban land use changes in erbil city kurdistan and to quantify the amount of variations in the land use classes by applying remote sensing approach the research examines multi dates landsat 5 tm imageries for 1987 2000 and 2011 by using supervised classification of maximum likelihood classifier to display and measure the changes in the land use classes in erdas 9 1 imagine processing software the accuracy of the overall classification was measured by using confusion metrics and kappa coefficient to test overall accuracy classification the study achieved an overall accuracy which rate from 95 96 43 and 94 29 in 1987 2000 and 2011 respectively which indicates that the research has achieved a significant level of classes the outcome of the study revealed that the study area has remarkably experienced changes in its land use cover during the period of the study as built up area was increased by 3975 66 to 6123 7 hectares over in 1987 to 2000 and 6123 7 to 12755 1 hectares in 2000 to 2011 on the other hand the amount of other classes has greatly declined during the period of the study from evidence from the post classification analysis has shown that open land and vegetation classes have experienced the most significant changes of rates in the urban land during the period of the research for example the rate of changes from open land to urban land is 5084 46 whereas the rate of the vegetation that converted to urban land is 2130 69

master s thesis from the year 2013 in the subject business economics business management corporate governance grade 1 3 university of applied sciences frankfurt a m language english abstract this thesis deals with the characteristics required of the leader of an international european company s outpost in china it provides a synthesis of current theories builds context based on supporting literature and is complemented by a survey of the different experiences of local managers to identify contemporary issues in the past companies expanded operations to china first and foremost to profit from the cost advantage that china offered meanwhile increasing consumer purchasing power and a developing preference for brand name and luxury goods make the chinese market a dynamic one that offers international companies substantial potential this market sales potential has become the main driver different forms of market entry are available for specific company strategies the most common are the representative office a joint venture and the wholly foreign owned entity in spite of the positive developments in the chinese market numerous challenges await companies planning to establish a local business unit the labour market exhibits weaknesses in the chinese education system job applicants often lack creativity and general communication skills as well as competent english skills although its importance is on a decline the issue of intellectual property remains a concern whereas the problem of corruption persists the standards and concepts used to recognize and label corruption are still deeply

linked with the local cultures making their reconciliation a challenge that companies need to overcome the human resource management strategy has to take cultural differences into consideration there are two main point of focus the first originates with confucian values status money and career perspective are aspirations that any attractive employment opportunity has to address western leaders also have to be aware that chinese social hierarchy dictates that interaction between managers and subordinates can cross the traditional western line between private and professional matters the second point of focus the posting of expatriates including preparation onsite support during the stay abroad as well as reintegration upon repatriation is integral to the project careful and detailed planning and execution are of utmost importance to ensure the successful completion of the chinese office setup

master s thesis from the year 2012 in the subject business economics supply production logistics grade 1 0 honours degree course supply chain management language english abstract today most multinational corporations mncs are eager to install sustainable standards not just within their own but also within their supply chain operations while the two pillars of sustainability economic and environmental are well researched within this field of business the third pillar social sustainability sss lags behind within the researchers focus however because of recent social scandals within the supply chain operations of multinationals an investigation targeting social sustainability and its effective implementation within the supply chain would provide important insights into such yet neglected field of research this thesis tries to tackle this issue and analyses whether mncs extent their sss practices to suppliers in regulatory distant countries the same way as they do within countries close to their home market the thesis intends to fill the research gap which exists around sss and provides valuable insides into how consistent mncs are in extending sss practices among their supplier network on the basis of telephone interviews and company data the thesis analyses the social sustainability efforts of the otto group the second largest online retailer in the world the two methods to monitor suppliers compliance that are examined in this thesis are assessment and collaboration results show that multinationals should not rely on either one of these two monitoring methods but should combine them using assessment only as first step and collaboration as second since assessment usually provides the buyer solely with a snapshot of the current situation at suppliers site collaboration as second step provides the relationship with a more mutual character frequent non compliance of parties the buyer and the supplier emphasise that collaboration and therefore mutual controlling processes are necessary in case the business relationship between buyer and supplier does involve operations in risky low regulated countries these findings are even more highlighted

this edited volume discusses the economic impact of sports facilities franchises and events on local economies written in honor of robert baade upon his retirement the book provides a state of the art of current research on the economic impact of sports and recognizes the seminal contributions that dr baade has made to this topic the analysis of the economic impact of spectator sports is a vital public policy topic as 75 billion has been spent on stadium construction since 1990 in the us alone with nearly 35 billion of this coming from taxpayer subsidies true public cost of sports franchises is much higher than this as this figure excludes facilities outside the big 5 domestic leagues like nascar track ncaa facilities minor league baseball and the canadian football leagues public subsidies for major events like the super bowl or olympic games and excludes sports subsidies outside of direct stadium construction subsidies including contributions from many of the most notable

researchers studying the economic impact of sports topics include impacts of stadiums and franchises on local economies labor markets and tax collections the effect of sports franchises on property values and changes in the public and academic discourse on sports subsidies over time this volume will be of interest to researchers and students of sports economics management public policy and public finance

master s thesis from the year 2023 in the subject geography earth science demographics urban management planning grade a ethiopian civil service university ecsu course research language english abstract the primary objective of this paper is to investigate the driving factors behind the emergence of informal settlements in dessie city it further examines the environmental degradation caused by these settlements and the availability of basic infrastructures within them the study employs a mixed method approach incorporating surveys structured interviews and field observations a total of 95 households from three sub cities were randomly sampled and six key informants were purposefully selected for interviews the study concludes with recommendations for improving the land management system increasing land plot supply advancing the condominium housing program and regularizing existing informal settlements
