Janeway's Immunobiology is a textbook for students studying immunology at the undergraduate, graduate, and medical school levels. As an introductory text, all students will appreciate the book's clear writing and informative illustrations, and advanced students and working immunologists will appreciate its comprehensive scope and depth. Janeway's

Immunobiology for Beginners, Second Edition, presents the latest information and developments from the field of immunology. The applied science of using living organisms and their by-products for commercial development, which has grown and evolved to such an extent over the past few years that increasing numbers of professionals work in areas that are directly impacted by the science, for the first time, this book offers an exciting and colorful overview of immunology for professionals and students in a wide array of the life sciences, including genetics, immunology, biochemistry, agronomy, and animal science. This book also appeals to the lay reader without a scientific background who is interested in an entertaining and informative introduction to the key aspects of immunology. Authors Renneberg and Demain discuss the opportunities and risks of individual technologies and provide historical data in easy-to-reference boxes highlighting key topics. The book covers all major aspects of the field, from food biotechnology to enzymes, genetic engineering, viruses, antibodies, and vaccines to environmental biotechnology, transgenic animals, analytical biotechnology, and the human genome. This stimulating book is the most user-friendly source for a comprehensive overview of this complex field, provides accessible content to the lay reader who does not have an extensive scientific background, includes all facets of immunology applications, covers articles from the most respected scientists, including Alan Guttmacher, Carl Djerassi, Frances S. Ligler, Jared Diamond, Susan Greenfield, and more, and contains a summary annotated

references links to useful web sites and appealing review questions at the end of each chapter presents more than 600 color figures and over 100 illustrations written in an enthusiastic and engaging style unlike other existing theoretical and dry style biotechnology books

this heavily illustrated text teaches parasitology from a biological perspective it combines classical descriptive biology of parasites with modern cell and molecular biology approaches and also addresses parasite evolution and ecology parasites found in mammals non mammalian vertebrates and invertebrates are systematically treated incorporating the latest knowledge about their cell and molecular biology in doing so it greatly extends classical parasitology textbooks and prepares the reader for a career in basic and applied parasitology

responding to the clear need for an immunology text written with the pharmacist and pharmaceutical scientist in mind this volume highlights issues of particular relevance to pharmacy practice including hypersensitivity reactions to natural allergens and pharmaceutical agents core immunological issues such as congenital immunodeficiency disorders and those caused by pathogens such as in aids are thoroughly discussed also highlighted is the impact of biotechnology on immunology and the development of immunopharmaceutical agents special attention is given to clinically related issues such as immunotherapy in cancer immune disorders and organ transplantation immunodiagnostic agents used professionally in hospitals as well as otc immunodiagnostics are covered appendices list all immunotherapeutic agents that have been developed or are still under development each chapter ends with a series of self assessment questions and or illustrative case studies which will be of use to students for exam preparation and revision

this now famous stress reducing review book is written exclusively by medical students for medical students preparing

for the usmle step 1 up to date study topics pinpoint key areas of basic science and clinical material saving students valuable time offers extensive mnemonics to facilitate rapid recall
