the first world war hardly ended with the formal armistice in europe on november 11 1918 amid the continuing violence of blockades and epidemics amid numerous forms of reconstruction and revolution its legacies in fact resonate deeply in our present nor is it obvious that it only began on july 28 1914 just a month after the assassination of the archduke franz ferdinand in sarajevo rather than these formal legal openings and closings the beginnings and endings of wartime are many depending upon the questions we ask and the frames of reference we provide for many at the time the outbreak of what would become the first world war was an inevitability the result of rising tensions over decades whether due to the dynamics and systems of international politics within europe or a result of the competitive logic of imperial politics as practised by europe outside its borders rebounding back upon it this resulted in equally persistent ideas down to our own time about the inevitability that followed from victory namely that to be successful and realistic modern politics and economics must necessarily be fixed in the form of a democratic nation state but this new world of democracy forged in war could easily become its own sort of intellectual prison house curating and limiting political and economic possibilities just as securely as any form of tyranny that the tyranny of victory was a danger recognized by many of the leading analysts of the first world war at the time helped to foster a continued search for ideas that might keep the worlds of politics and economics open to alternative futures rather than being closed by the force of a few great powers or the presentational fiat of democracy those hopes paved the way for the wide variety of anti imperial federal diasporic and revolutionary forms of political and economic arrangements which were designed to challenge the seemingly inevitable rise of the nation state worlds of wartime the first world war and the reconstruction of modern politics provides a new intellectual history of the many and varied ideas about politics and economics that were made and remade through wartime and revolution by political and economic thinkers working across the globe from the 1880s to the 1930s spanning continents connecting networks of people power and possibilities in new and often experimental ways the worlds of wartime saw histories of modern politics and economics revised and updated used as well as abused in myriad attempts to interpret explain understand explore and indeed to win the war this book takes the measure of a great many of these overlapping visions and it does so by trying to learn some of the lessons that literary and artistic modernism can teach us about the complexities of political and economic ideas their contingency and uncertainty and how they are fixed into focus only at very particular

moments moving from the stylised narratives of european and american political theory and intellectual history through to the futurist politics of revolutionaries in ireland india ottoman turkey and russia this book also tracks arguments and strategies for pan african diasporic federation alongside german and american debates about federal pasts and federal futures from the invention of the world economy to the reality of multiple war economies from revolutionary conjunctures to ideas of democracy and climate catastrophe in the anthropocene today worlds of wartime tells the story of just how strongly modern politics in general and modern ideas about political and economic possibility were fixed by the intellectual turbulence wrought during the first world war

this study traces the evolution of imperialist ideology in germany from bismarck in the mid 19th century through hitler smith argues that it was the way in which nazis attempted to reconcile two century old ideologies the élite pro industrial weltpolitick and the popular based pro agrarian lebensraum that resulted in germany s disastrous policies during world war ii this is the first book to treat nazi imperialism as a separate ideology and set it within a sturdy theoretical framework

the period spanning the two world wars was unquestionably the most catastrophic in europe s history despite such undeniably progressive developments as the radical expansion of women s suffrage and rising health standards the era was dominated by political violence and chronic instability its symbols were verdun guernica and auschwitz by the end of this dark period tens of millions of europeans had been killed and more still had been displaced and permanently traumatized if the nineteenth century gave europeans cause to regard the future with a sense of optimism the early twentieth century had them anticipating the destruction of civilization the fact that so many revolutions regime changes dictatorships mass killings and civil wars took place within such a compressed time frame suggests that europe experienced a general crisis the oxford handbook of european history 1914 1945 reconsiders the most significant features of this calamitous age from a transnational perspective it demonstrates the degree to which national experiences were intertwined with those of other nations and how each crisis was implicated in wider regional continental and global developments readers will find innovative and stimulating chapters on various political social and economic subjects by some of the leading scholars working on modern european history today

this is a small book on a very large subject it is written for the general reader and for students who want an overview of modern european imperialism and an indication of some of the major issues with which historians of imperialism are currently concerned obviously such a book cannot go into detail on any aspect of the subject i have attempted wherever possible to use particular cases of imperialism to represent larger phenomena that occurred in many different places and at different times i have also included references to important works on the subjects discussed in each section of the book preference has been given to recently published studies and to those in english which are most likely to be available to the reader although the book is not purely a narrative and is organized around a number of theses the presentation of the theses is necessarily abbreviated and the support for them incomplete they should be considered as means of structuring the material fuller exposition must await future publications preface
