organic chemistry transition from high school to college is a comprehensive textbook on foundational organic chemistry which aims to provide a seamless link between the higher secondary and the undergraduate level the book has been organized logically to provide an excellent coverage on the structure reactions and synthesis of organic compounds advanced high school students and beginning undergraduates will find this book invaluable for their academic progression and also for competitive entrance examinations also students in pharmaceuticals polymer science and medicinal chemistry will find this book very useful key features clear explanations of basic principles of organic chemistry logical approaches from structure to reactions to synthesis of organic molecules inclusion of spectroscopy and retrosynthesis as advanced topics introduction to polymers and biomolecules as special topics inclusion of in chapter problems with detailed answers and end of chapter supplementary problems for practice

written by stanley manahan fundamentals of sustainable chemical science has been carefully designed to provide a basic introduction to chemistry including organic chemistry and biochemistry for readers with little or no prior background in the subject manahan bestselling author of many environmental texts presents the material in a practical

chemistry and biochemistry of flavoenzymes summarizes the present knowledge of the chemical and physical properties of free flavin modified flavins occurring in nature and deazaflavin this information forms the fundamental basis for understanding the catalytic properties of flavoenzymes flavoproteins involved in transport electron transfer oxidation dehydrogenation and hydroxylation reactions are discussed with respect to their biochemical and biophysical properties the book presents the catalytic mechanisms of the flavoproteins in detail and where available three dimensional structures and molecular biology data are included the medical aspects of free and protein bound flavin are also briefly discussed chemistry and biochemistry of flavoenzymes is an essential reference source for chemists biochemists toxicologists biologists pharmacologists and researchers in the pharmaceutical industry

as phenols represent an important functional group category the chemistry of phenols is an essential addition to any chemistry library written by experts all aspects concerning these compounds are covered making this an essential reference book

bringing together invaluable information into one source for organic organometallic chemists as well as chemists from a variety of other organic sub disciplines single source information essential for organic organometallic and chemists from organic sub disciplines covers phenols as anti oxidants synthetic intermediates polymers and hydrogen bonds discusses electrophilic and photochemical reactions the patai series publishes comprehensive reviews on all aspects of specific functional groups each volume contains outstanding surveys on theoretical and computational aspects nmr ms other spectroscopic methods and analytical chemistry structural aspects thermochemistry photochemistry synthetic approaches and strategies synthetic uses and applications in chemical and pharmaceutical industries biological biochemical and environmental aspects to date over 100 volumes have been published in the series also available online the chemistry of phenols as well as the other titles within the patai series is also available in electronic format on wiley interscience all new titles will be published online and a growing list of older titles will be added every year

proceedings of the society are included in v 1 59 1879 1937

green chemistry has brought about dramatic changes in the teaching of chemistry that have resulted in increased student excitement for the subject of chemistry new lecture materials new laboratory experiments and a world wide community of green chemistry teachers this book features the cutting edge of this advance in the teaching of chemistry

basic text at the senior and graduate levels in such courses as enzyme chemistry enzymology and mechanistic enzymology and as supplementary reading in courses on bioorganic mechanism and bioorganic chemistry
