this book presents a comprehensive and detailed study of literacy practices and language use outside of the classroom by university students of japanese it investigates both tasks related to classes e g homework and preparation for classes and voluntary activities in the target language e g watching tv and writing emails and discusses how values motivations and types of activities differ between the two contexts it employs sociocultural perspectives to observe reading and writing activities within and under the influence of individual and social contexts such as learner motives peer networks and the language classroom and contributes to the related research areas in the field of second language acquisition such as motivation autonomous language learning and language learning strategies crucially the book not only documents out of class literacy activities but also examines which teaching practices facilitate and promote such out of class language learning and use it considers which literacy activities in the target language students undertake out of class which factors encourage or discourage such out of class activity and how and with which tools they undertake these activities as such the book provides guidance for classroom teaching and suggests that slight changes to teaching practices in the classroom may enhance autonomous learning outside the classroom

this book takes a look at the affordances of engaging second foreign language students in educational projects that bridge the gap between the classroom and the museum studies on language learning and teaching beyond the classroom have shown that students learn in different settings and through different types of activities and that their learning is influenced by the intersection of different dimensions drawing on both language and museum learning and teaching research this book discusses the aspects that make the museum an ideal language learning setting and then outlines evidence based pedagogical guidelines to design effective learning experiences for language learners across the classroom and the museum it will be of interest to graduate students language teachers teacher trainers museum educators and researchers in fields including educational linguistics anthropological linguistics and museum studies education

this book explores globally informed culturally rooted approaches to dialogue in the classroom it seeks to fill gaps in communication and education literature related to

decolonizing dialogue and breaking binaries by decentering eurocentric perspectives and providing space for dialogic practices grounded in cultural wealth of students and teachers we first describe the book's genesis contextualize dialogue within the global impact of the covid 19 pandemic and share guiding concepts of inclusion intersectionality and authenticity in dialogue and pedagogy we also distinguish dialogue from other practices and times in which dialogue may not be possible the book brings fresh and urgent perspectives from authors across different disciplines including ceramics religious studies cultural studies communication family therapy and conflict resolution the chapters distill the idea of dialogue within contexts like a bible circle university sculpture studio trauma and peacebuilding program and connect dialogue to teaching learning and emerging ideas of power disruption in betweenness and relationality

this is the sort of book that should be given free to every teacher as they walk through the door of their first classroom it is both inspirational and practical and will be lapped up by teachers who have still not forgotten that their pupils are people first and sats levels second the book is well presented and incorporates children's work into the text i love the idea of using a two inch voice when working in a group very effectively the fact that it is american doesn't bother me at all what bothers me more is that the fact that it is american will be used as an excuse by some educators in the uk to at best ignore the book and at worst attempt to ridicule it so all good stuff in a nutshell a book which is basically about empowering children to have a say in their own learning lady plowden must be cheering in her grave nurturing potential tomorrow's leaders will be reflections of today's teachers the ideal classroom consists of a positive relationship between teacher and students producing a harmonious environment resulting in beneficial mutual fulfillment in this empowering new book patricia sequeira belvel and marcia jordan demonstrate successful methods to achieve tranquility while transforming managerial teachers into leaders in the classroom educators are enlightened by classroom and personal connections enabling the teacher to be immersed in real life classroom situations and encouraging the reader to create a meaningful connection from their personal experiences key topics that help guide the readers through this transformation are intrinsic motivation and personal beliefs and values as aids to making the shift from manager to leader prevention strategies creating a caring community of learners temporary intervention techniques that effectively differentiate between discipline and punishment problem solving strategies to help the student take initiative in creating constructive solutions for all rethinking classroom management is an innovative guide in which these resourceful authors illustrate an approach which has been used by successful educators for years enabling teachers to evolve effectively into leaders and to create classrooms where students are more self managing demonstrating

mutual respect self esteem and responsibility

classroom discourse and the space of learning is about learning in schools and the central role of language in learning the investigations of learning it reports are based on two premises first whatever you are trying to learn there are certain necessary conditions for succeeding although you cannot be sure that learning will take place when those conditions are met you can be sure that no learning will occur if they are not the limits of what is possible to learn is what the authors call the space of learning second language plays a central role in learning it does not merely convey meaning it also creates meaning the book explicates the necessary conditions for successful learning and employs investigations of classroom discourse data to demonstrate how the space of learning is linguistically constituted in the classroom classroom discourse and the space of learning makes the case that an understanding of how the space of learning is linguistically constituted in the classroom is best achieved through investigating classroom discourse and that finding out what the conditions are for successful learning and bringing them about should be the teacher's primary professional task thus it is fundamentally important for teachers and student teachers to be given opportunities to observe different teachers teaching the same thing and to analyze and reflect on whether the classroom discourse in which they are engaged maximizes or minimizes the conditions for learning is both more culturally situated and more generalizable than many other studies of learning in schools each case of classroom teaching clearly demonstrates how the specific language culture and pedagogy molds what is happening in the classroom yet at the same time it is possible to generalize from these culturally specific examples the necessary conditions that must be met for the development of any specific capability regardless of where the learning is taking place and what other conditions might be present and encompasses both theory and practice providing a detailed explication of the theory of learning underlying the analyses of classroom teaching reported along with close analyses of a number of authentic cases of classroom teaching driven by classroom discourse data which have practical relevance for teachers intended for researchers and graduate students in education teacher educators and student teachers classroom discourse and the space of learning is practice and content oriented theoretical qualitative empirical and focused on language and links teaching and learning in significant new ways

this work contains practical strategies for dealing with everyday problems in the classroom

when the student is ready the teacher will appear lao tzu but is the teacher ready that's the question that challenges every teacher on that fateful first day in the

classroom making it through that day and the 179 school days that follow is how every career in education and lifelong learning truly begins in my first year in the classroom you ll laugh cry and undeniably empathize when you read about these fifty teachers trials tribulations and triumphs they ve experienced during their first year on the job organized along the lines of the school calendar these touching tales will illustrate for you the learning curve ex experienced by new teachers as they face day on meet the students surprise the students bond with faculty and staff be surprised by the students watch the students bloom say farewell from the hilariously obsessive compulsive preparation of a rookie english professor to the poignant lesson a bold third grader imparts upon his novice teacher about love and acceptance this moving collection is sure to motivate you whether you ve been teaching for years or days
