this book is an argument for reflexivity in the act of teaching which means to acknowledge that intention guides the act of teaching teaching must create attention towards processes of collectivity in the classroom today teaching is both acts of expressing knowledge and acts of securing justice to all students through a mediation of knowledge teaching therefore expresses both knowledge with reference to school subjects and justice according to the distribution of this knowledge the authors argue for teaching as the driver of education to pay attention to teaching is to pay attention to that which is inside the system of education to consider education as a mediation of knowledge between generations places teaching as an act of performing the content of education in a class in a school the complexity of these processes is easily overlooked when education is used as a means in competitive economies the approach taken in this text is that deliberations about teaching must be based on historicity the support for this argument builds on a reading of the french philosopher paul ricoeur the book addresses teaching as an integral part of the learning process in education today everything seems to be concentrated around learning as if teaching no longer takes place teachers and teacher educators need a language to discuss and understand teaching both as personal and institutional actions a ricoeurian approach to a discussion on teaching as a reflexive and institutional practice provides a timely approach to important questions related to teaching in our day and age

my aim in writing this book is to show that the externalism of the west the prevalent tendency to pay undue regard to outward and visible results and to neglect what is inward and vital is the source of most of the defects that vitiate education in this country and therefore that the only remedy for those defects is the drastic one of changing our standard

of reality and our conception of the meaning and value of life my reason for making a special study of that branch of education which is known as elementary is that i happen to have a more intimate knowledge of it than of any other branch the inside of an elementary school being so familiar to me that i can in some degree bring the eye of experience to bear upon the problems that confront its teachers i do not for a moment imagine that the elementary school teacher is more deeply tainted than his fellows with the virus of occidentalism nor do i think that the defects of his schools are graver than those of other educational institutions in my judgment they are less grave because though perhaps more glaring they have not had time to become so deeply rooted and are therefore one may surmise less difficult to eradicate also there is at least a breath of healthy discontent stirring in the field of elementary education a breath which sometimes blows the mist away and gives us sudden gleams of sunshine whereas over the higher levels of the educational world there hangs the heavy stupor of profound self satisfaction

one day in 1938 john dewey addressed a room of professional educators and urged them to take up the task of finding out just what education is reading this lecture in the late 1940s philip w jackson took dewey s charge to heart and spent the next sixty years contemplating his words the stimulating result of a lifetime of thinking about educating what is education is a profound philosophical exploration of how we transmit knowledge in human society and how we think about accomplishing that vital task most contemporary approaches to education follow a strictly empirical track aiming to discover pragmatic solutions for teachers and school administrators jackson argues that we need to learn not just how to improve on current practices but also how to think about what education means in short we need to answer dewey by constantly rethinking education from the ground up guiding us through the many facets of dewey s comments jackson also calls on hegel kant and paul tillich to shed light on how a society does can and should transmit truth and knowledge to successive generations teasing out the implications in these thinkers works ultimately leads jackson to the conclusion that education is at root a moral enterprise at a time when schools increasingly serve as a battleground for ideological contests what is education is a stirring call to refocus our minds on what is for jackson the fundamental goal of education making students as well as teachers and therefore everyone better people
