most scholars link the origin of politics to the formation of human societies but in this innovative work Tilo Schabert takes it even further back to our very births drawing on mythical philosophical religious and political thought from around the globe including America Europe the Middle East and China the second birth proposes a transhistorical and transcultural theory of politics rooted in political cosmology with impressive erudition Schabert explores the physical fundamentals of political life unveiling a profound new insight our bodies actually teach us politics Schabert traces different figurations of power inherent to our singular existence things such as numbers time thought and desire showing how they render our lives political ones and thus how politics exists in us individually long before it plays a role in the establishment of societies and institutions through these figurations of power Schabert argues we learn how to institute our own government within the political forces that already surround us to create our own world within the one into which we have been born in a stunning vision of human agency this book ultimately sketches a political cosmos in which we are all builders in which we can be at once political and free

curiosity about our beginning continues to haunt the human race it will not call off the quest for its origins the opening chapters of Genesis important at any time have been the focal point of controversy for more than a century few topics have been so hotly debated by theologians philosophers and scientists alike Henri Blocher argues that our primary task is to discover what these key chapters of the Bible originally meant only then will we be able to unravel the knotty issues surrounding human origins taking into account a vast array of scholarship Blocher provides a detailed study of creation week the image of God the significance of male and female the garden covenant the fall the curse and the promise of redemption he also offers significant theological insights into the creation evolution debate

this book on the first chapters of Genesis is not concerning the literal creation of the universe there is more than an ample supply of commentaries on how God created the earth and the heavens Genesis is the book of beginnings the first chapter of Genesis is about the mystical creation of the body of Christ in what way was Jesus the beginning of the creation of God enjoy the study
