this book gives an introduction to main ideas used in the physics of ultra relativistic heavy ion collisions the links between basic theoretical concepts discussed gradually from the elementary to more advanced level and the results of experiments are outlined so that experimentalists may learn more about the foundations of the models used by them to fit and interpret the data while theoreticians may learn more about how different theoretical ideas are used in practical applications the main task of the book is to collect the available information and establish a uniform picture of ultra relativistic heavy ion collisions the properties of hot and dense matter implied by this picture are discussed comprehensively in particular the issues concerning the formation of the quark gluon plasma in present and future heavy ion experiments are addressed

the ultimate handbook on microwave circuit design with cad full of tips and insights from seasoned industry veterans microwave circuit design offers practical proven advice on improving the design quality of microwave passive and active circuits while cutting costs and time covering all levels of microwave circuit design from the elementary to the very advanced the book systematically presents computer aided methods for linear and nonlinear designs used in the design and manufacture of microwave amplifiers oscillators and mixers using the

newest cad tools the book shows how to design transistor and diode circuits and also details cad s usefulness in microwave integrated circuit mic and monolithic microwave integrated circuit mmic technology applications of nonlinear spice programs now available for microwave cad are described state of the art coverage includes microwave transistors hemts modfets mesfets hbts and more high power amplifier design oscillator design including feedback topologies phase noise and examples and more the techniques presented are illustrated with several mmic designs including a wideband amplifier a low noise amplifier and an mmic mixer this unique one stop handbook also features a major case study of an actual anticollision radar transceiver which is compared in detail against cad predictions examples of actual circuit designs with photographs of completed circuits and tables of design formulae
