max weber s celebrated thesis which explores the relationship between protestant work ethic and the emergence of capitalist enterprise is presented here inclusive of his lengthy notes in coining the phrase protestant work ethic weber demonstrates a series of parallels between certain protestant denominations and the modern business the veneration of hard work discipline and carefulness with money birthed a culture that led over generations to the establishment of capitalism with enough workers sharing in these beliefs entrepreneurs were able to create large businesses that could consistently deliver a profit using examples such as martin luther and calvinist doctrines weber demonstrates how ideas of the virtues of diligence

were placed parallel with god and morality by working hard every man was contributing to a better world and society in the name of the lord however weber asserts that over time the religious connotations behind capitalist enterprise largely disappeared the famous writings of benjamin franklin are cited as example whereby notions of diligence were expressed eloquently but no longer cited god and holy virtue though controversial weber s work remains much consulted by sociologists the notion that protestantism contributed to or accelerated the development of capitalism is popular in the modern day

excerpt from the protestant ethic and the spirit of capitalism max weber s essay *die protestantische ethik und der geist des kapitalismus* which is here translated was first published in the *archiv fur sozialwissenschaft und sozialpolitik* volumes xx and xxi for 1904 5 it was reprinted in 1920 as the first study in the ambitious series *gesammelte aufsatze zur religionssoziologie* which was left unfinished by weber s untimely death in that same year for the new printing he made considerable changes and appended both new material and replies to

criticism in footnotes the translation has however been made directly from this last edition though the volume of footnotes is excessively large so as to form a serious detriment to the reader's enjoyment it has not seemed advisable either to omit any of them or to attempt to incorporate them into the text as it stands it shows most plainly how the problem has grown in weber's own mind and it would be a pity to destroy that for the sake of artistic perfection a careful perusal of the notes is however especially recommended to the reader since a great deal of important material is contained in them the fact that they are printed separately from the main text should not be allowed to hinder their use the translation is as far as is possible faithful to the text rather than attempting to achieve any more than ordinary clear english style nothing has been altered and only a few comments to clarify obscure points and to refer the reader to related parts of weber's work have been added about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

political developments

drawing on unpublished archival material this volume compares moravian economic practice in three different mission settings to demonstrate how moravian practices evolved during the 18th century as part of a globalizing world and economy delivering in depth analysis of the far reaching and deep seated effects of missionary activity on indigenous communities and social relations it explores how different economic contexts had an impact on the missionaries relations with indigenous and slave populations in empire pettersen provides an insight how the missionaries worked lived among various non european peoples and how they organised themselves and their surroundings at a time of changing identities and socio economic change analysing how missionary practice developed over this period it also demonstrates how the moravian leadership s priorities and how this affected attitudes to non european peoples on the ground standing outside of national and imperial boundaries and ambivalent about the political notion of imperialism as well as colonisation itself moravian missionaries nonetheless functioned in parallel with colonial structures and were part of a broadly culturally colonial mission so even on the outskirts of imperial organisation they were often a crucial part of colonial practice and took part in normalising capitalist relations in many but not all settings as this book demonstrates
