in how to end the autism epidemic generation rescue s co founder j b handley offers a compelling explanation of what s causing the autism epidemic the lies that enable its perpetuation and the steps we must take as parents and as a society in order to end it while many parents have heard the rhetoric that vaccines are safe and effective and that the science is settled about the relationship between vaccines and autism few realize that in the 1960s american children received three vaccines compared to the thirty eight they receive today or that when parents are told that the odds of an adverse reaction are one in a million the odds are actually one in fifty or that in the 1980s the rate of autism was one in ten thousand children today it s one in thirty six parents educators and social service professionals around the country are sounding an alarm that we are in the midst of a devastating public health crisis one that corresponds in lockstep with an ever growing vaccine schedule why do our public health officials refuse to investigate this properly or even acknowledge it in how to end the autism epidemic handley confronts and dismantles the most common lies about vaccines and autism he then lays out in detail what the truth actually is new published science links the aluminium adjuvant used in vaccines to immune activation events in the brains of infants triggering autism and there is a clear legal basis for the statement that vaccines cause autism including previously undisclosed depositions of prominent autism scientists under oath while handley s argument is unsparing his position is

ultimately moderate and constructive we must continue to investigate the safety of vaccines we must adopt a position of informed consent and every individual vaccine must be considered on its own merits this issue is far from settled by refusing to engage with parents and other stakeholders in a meaningful way our public health officials destroy the public trust and enable the suffering of countless children and families j b handley breaks down the scientific information in a way that doesn't intimidate the reader and he lets us know it's okay to be angry his soul his fight his love for his son radiates off the pages wow bravo bravo jenny mccarthy author of louder than words coauthor of healing and preventing autism
