jan bazant has woven into a coherent whole the chaotic series of political and social upheavals that characterised mexican history from the start of the struggle for independence through the completion of basic social reforms in 1940 the colonial reaction to the forced loans exacted by the spanish government in 1805 to finance its war against great britain was in professor bazant s view the starting point of the mexican independence movement she argues that a new phase of mexican history began when the liberals abolished the power and wealth of the catholic church mexico s rapid economic growth in the last quarter of the nineteenth century was largely the result of the stable political climate created by the dictatorship of porfirio diaz under diaz however most rural areas remained backward and it was precisely the contradiction between the urban industrial economy and the traditional structure of the countryside that led to the mexican civil war between 1910 and 1920 the agrarian reform finally transformed the rigid social system and created mexico as we see it today

of recent years there has been a great output of literature bearing on mexico most of it unfortunately of the tourist type distorted and jaundiced there is indeed real need for a reliable popular history of mexico and notwithstanding the two books of mr noll the need is still unsatisfied his second which has to do with the nineteenth century is in one sense an expansion of that part of the short history covering the same period and very much improves it in the short history the author set out to write a guide book he at first thought of offering his work to the tourists in mexico to aid them in enjoying the sights of that country this idea was abandoned after the manuscript was in the hands of the publishers in deference to the opinions of others that the book would be beneficial to the public generally no less in need of such a history than the tourist the result is that we have neither guidebook nor history but a potpourri of unnamable stuff the work was first issued in 1890 and this purports to be a revised edition but how it ever came to be printed 11 second time is the wonder of it it is proof at least that the public has more interest in our neighboring republic than discrimination mr noll sets out to portray the origins of the aborigines of mexico tracing the aztecs from the cliff houses of colorado and new mexico to the valley of mexico where having seen an eagle standing upon a nopal prickly pear cactus strangling a serpent they founded the city of tenochtitlan afterward the city of mexico from this one can judge how successfully this early and fascinating story is disposed of the conquest is discussed with no insight into the general history of the period to attempt the narrative of it without some knowledge of the relation it bore to the expeditions that everywhere penetrated the coasts of the new world from labrador to the orinoco is to miss the mark completely separate it if you please from the larger world movement of exploration and colonization but give us its setting in the history of spain it will lose none of its glamour but even this is denied us the nation volume 78
