venice came to life on spongy mudflats at the edge of the habitable world protected in a tidal estuary from barbarian invaders and byzantine overlords the fishermen salt gatherers and traders who settled there crafted an amphibious way of life unlike anything the roman empire had ever known in an astonishing feat of narrative history james h s mcgregor recreates this world turned upside down with its waterways rather than roads its boats tethered alongside dwellings and its livelihood harvested from the sea mcgregor begins with the river currents that poured into the shallow lagoon carving channels in its bed and depositing islands of silt he then describes the imaginative responses of venetians to the demands and opportunities of this harsh environment transforming the channels into canals reclaiming salt marshes for the construction of massive churches erecting a thriving marketplace and stately palaces along the grand canal through mcgregor s eyes

we witness the flowering of venice s restless creativity in the elaborate mosaics of st mark s soaring basilica the expressive paintings in smaller neighborhood churches and the colorful religious festivals but also in theatrical productions gambling casinos and masked revelry which reveal the city s less pious and orderly face mcgregor tells his unique history of venice by drawing on a crumbling tide threatened cityscape and a treasure trove of art that can still be seen in place today the narrative follows both a chronological and geographical organization so that readers can trace the city s evolution chapter by chapter and visitors can explore it district by district on foot and by boat
