the entire lifespan in 500 pages what s the greatest challenge in teaching the life span development course covering a lifetime of material in a single term instructors from across the country have clamored for a streamlined text that captures the core concepts of life span development essentials of life span development was carefully designed and constructed to deliver these core concepts along with a strong applications focus reflecting the broad range of interests and backgrounds of students taking this course and as always with john santrock s texts the latest research in the field is incorporated throughout

ebook life span development

although integrative conceptions of development have been gaining increasing interest there have been few attempts to bring together the various threads of this emerging trend the handbook of integrative developmental science seeks ways to bring together classic and contemporary theory and research in developmental psychology with an eye toward building increasingly integrated theoretical and empirical frameworks it does so in the form of a festschrift for kurt fischer whose life and work have both inspired and exemplified integrative approaches to development building upon and inspired by the comprehensive scope of fischer s dynamic skill theory this book examines what an integrated theory of psychological development might look like bringing together the work of prominent integrative thinkers the volume begins with an examination of philosophical presuppositions of integrative approaches to development it then shows how dynamic skill theory provides an example of an integrative model of development after examining the question of the nature of integrative developmental methodology the volume examines the nature of developmental change processes as well as pathways and processes in the development of psychological structures both within and between psychological domains the team of expert contributors cover a range of psychological domains including the macro and micro development of thought feeling motivation self intersubjectivity social relations personality and other integrative processes it ends with a set of prescriptions for the further elaboration of integrative developmental theory and a tribute to kurt fischer and his influence on developmental psychology this book will be essential reading for graduate students and researchers of developmental psychology and human

development specifically developmental science

in this book sheila greene presents a challenging new perspective on the psychological development of girls and women which emphasises the central role of time in human development she critically reviews traditional and contemporary theoretical approaches ranging from orthodox psychoanalysis to relational and post modern theories and argues that even those claiming to be focused on development have presented a view of women s lives as fixed and determined by their nature or their past these theories she believes should be rejected because of their inherent lack of validity and their frequently oppressive implications for women greene s approach places primary importance on temporality itself and on the competing discourses on time age and development which play an active role in the construction of the lives of girls and women essential but often neglected insights from the more compelling developmental and feminist theories are woven together within a theoretical framework that emphasises temporality emergence and human agency the result is a liberating theory of women s psychological development as constantly emerging and changing in time rather than as static and fixed by their nature socio cultural context and personal history the psychological development of girls and women will be essential reading for students and researchers in the psychology of women developmental psychology and women s studies
