general hasting ismay invariably referred to as pug was one of the most intriguing yet less well known leading military characters of his era this overdue biography describes how an officer who fought tribesmen in india and dervishes in north east africa thereby playing no significant role in the great war found himself as winston churchill s chief of staff throughout the second world war in this hugely influential position he eased the often fraught relationship between a determined and obstinate prime minister and his top military advisors his tact and diplomacy were tested to their limits oiling the wheels with our american allies both political and military even those with anglophobic tendencies based in 10 downing street pug accompanied churchill on his overseas visits and to the major conferences post war ismay assisted mountbatten in the partitioning of the indian sub continent before becoming the first nato secretary general a measure of

the high regard the united states and other nations held him in despite the influence he wielded during and after the second world war ismay remains a mysterious figure who somehow managed to maintain the trust of those with whom he worked and dealt with under the most testing and stressful conditions this insightful biography is a most welcome and valuable addition to the history of the period

neville chamberlain is remembered today as hitler s credulous dupe the man who proclaimed in september 1938 that the munich agreement guaranteed peace in our time this is a magisterial reappraisal of chamberlain and his legacy it reveals the nuances of a complex and sensitive man who was a true radical and a man of passion especially in all that concerned the welfare of his fellow citizens as minister of health chancellor and prime minister he presided over a fundamental modernisation of britain shutting the door on the victorian age ending free trade improving living conditions and abolishing the poor law and the workhouse munich was much more than the traditional narrative suggests scarred by the death of his cousin in the first world war chamberlain was determined to ensure that a new generation was spared the tragic waste that had consumed their elders even so he prepared for war while he worked for peace the aircraft that won the battle of britain were built on his watch he didn t win the second world war but it was he who ensured it wasn t lost in 1940

written by a former harvard professor of decision science and game theory this book presents original insights on the strategies and tactics undertaken in four major battles of the second world war that the fighting at gazala in libya in the late spring of 1942 constituted what has been called probably the most spectacular series of victories ever gained over a british army was in part due to its having violated the game theoretic zero sum maxim of napoleon do not do what your enemy wishes you to the sensational british reversal of that disaster later that year at el alamein in egypt derived largely from heeding the millennia old military priority of command unity which has been analyzed and re endorsed by modern decision science this discipline has also judged the somewhat disappointing victory of the allies at falaise in france in august of 1944 to have resulted from excessive risk aversion possibly induced by three different types of fatigue one month later the allied setback at arnhem in the netherlands called into question from the perspective of game theory the value of battlefield surprise these

decisions approached from an expert perspective on game theory and presented with high quality maps are presented in this pioneering application of decision science to the battles of world war ii
