preeclampsia is a disorder of pregnancy characterized by high blood pressure edema and proteinuria that affects 2-8% of pregnancies worldwide. Hypertensive disorders of pregnancy including preeclampsia are among the most common causes of death in pregnant persons. Over six chapters, this book examines the pathophysiology of preeclampsia, vitamin D deficiency as a risk factor for preeclampsia, the cellular changes that occur with preeclampsia, associated organ dysfunction, gestational endotheliopathy, and ophthalmic complications of preeclampsia.

A new enhanced focus on prioritization of care in clinical reasoning, case studies, and nursing care plans is consistent with NCLEX updates. New recognition of the importance of interprofessional care covers the roles of the various members of the interprofessional healthcare team. Updated content on many high-risk conditions, updated to reflect newly published guidelines, new information about the Zika virus, gives you the most current practice guidelines to help you provide quality care. New coverage of future trends in contraception, help increase your awareness of developing ideas in pregnancy prevention, content on gestational diabetes and breast cancer screening, cover newly published guidelines, new added content on human trafficking provides you with examples and ideas on how to counsel victims and their

families
