total supply of fresh water on earth far exceeds human demand however scarcity of water currently faced in
 many regions of the world is caused by two reasons first its availability in time and space is not equally distributed
 thus there is problem of water in the wrong place or at the wrong time and in wrong quantities second while the
 population growth and expanded industrial activities are increasing demands on available water resources they
 also jeopardize the availability of freshwater in adequate quantities by discharge of pollutants into freshwater
 sources it is at times like these when the rising curve of water demand intersects the fluctuating curve of water
 availability recycle and reuse of wastewater is seriously considered wastewater recycling reuse and reclamation
 have been now accepted as appropriate ways to conserve water resources as well as to contain polluted waters
 from contaminating other available clean water sources this book gives a comprehensive review on water
 quantity and quality simple water supply and sanitation systems and leads to domestic agricultural and industrial
 water reuse thus it will provide useful information not only to technologists but also for planners managers and
 ngos involved in the water sector the contribution to the book comes from a broad pool of experts working on
