in this provocative work sophia heller challenges the assumption that we cannot be without myth that myth is necessary to vital soulful living indeed heller argues we have been living in a world without myth for a long time the absence of myth examines the loss of a religious mode of being in the world and demonstrates how theorists who insist on the presence of myth deny its historical end absence of myth may seem obvious evidenced by our lack of cult and ritual and by our de animated natural world as well as in the emergence of conceptual thought and psychological awareness which could only arise with the dissolution of a prereflective mythic mode of being in the world but what appears to be straightforward becomes complicated when myth is intentionally conflated with thought and reflection usually in the attempt to cultivate a mythic consciousness that aims to restore meaning to life and assuage the spiritual malaise of contemporary culture myth cannot rest in peace it must be continually unearthed redefined and recontextualized such that modern and postmodern notions of myth are made to substitute for something that has never been experienced only imagined

the contributors to this collection of essays on the literary use of myth in the early twentieth century and its literary and philosophical precedents from romanticism onwards draw on a range of disciplines from anthropology comparative literature and literary criticism to philosophy and religious studies the underlying assumption is that modernist myth making does not retreat from modernity but projects a mode of being for the future which the past could serve to define modernist myth is not an attempted recovery of an archaic form of life so much as a sophisticated self conscious equivalent far from seeking a return to an earlier romantic valorizing of myth these essays show how the true interest of early twentieth century myth making lies in the consciousness affirmative as well as tragic of living in a human world which in so far as it must embody value can have no ultimate grounding although myth may initially appear to be the archaic counterterm to modernity it is thus also the paradigm on which modernity has repeatedly reconstructed or come to understand its own life forms the very term myth by combining in its modern usage the rival meanings of a grounding narrative and a falsehood encapsulates a central problem of modernity how to live given what we know

much of the theorizing about myth in philosophy and religious studies grows out of efforts to understand the classics and the bible in the case of the classics the presence of myth has been taken for granted and conclusions reached about greek and roman mythology have spurred generalizations about myth in the case of the bible however the existence of myth has been contested in fact judaism and christianity are regularly praised for their nonmythic outlook conclusions reached

about the presence or absence of myth in either the hebrew bible or the new testament have led to generalizations about myth per se many of the essays in this volume apply theories of myth to classical biblical and ancient near eastern cases but in so doing they draw conclusions about the nature of myth itself those essays that criticize past applications make generalizations as well by no means has all theorizing about myth from philosophy and religious studies centered on the ancient world and this volume contains selections from theories in both disciplines that stem from reflections on the nature of science language knowledge and reality

this book first published in 1990 summarizes and evaluates the contribution of martin buber as a theorist of myth buber provides explicit guidelines for understanding and evaluating myths he describes reality as twofold people live either in a world of things to which they relate as a subject controlling its objects or in a world of self conscious others with whom one relates as fellow subjects human beings require both types of reality but also a means of moving from one to the other buber understands myths as one such means by which people pass from i it reality to i you meeting in studying myths he focuses on the myths in the traditions he knows best but offers his advice and interpretation of mythology and scholarship about mythology generally

beginning with the tatters of europe after world war i the authors deftly survey a myriad of christian theologians these theologians have responded creatively to the steep challenges to faith in this tumultuous century from karl barths no to reinhold niebuhr s christian realism from dietrich bonhoeffer s religionless christianity to

rosemary radford ruether s feminist liberation theology easily accessible to both the theological student and the inquiring lay reader this succinct and reliable guide opens doors to some of the most profound religious insights of our time

in evil spirits and possession an emergentist theology of the demonic david bradnick develops a multidisciplinary view of the demonic using biblical theological social scientific and philosophical scientific perspectives building upon the work of pentecostal theologian amos yong this book argues for a theology informed by emergence theory whereby the demonic arises from evolutionary processes and exerts downward causal influence upon its constituent substrates consequently evil does not result from conscious diabolic beings rather it manifests as non personal emergent forces that influence humans to initiate and execute nefarious activities emergentism provides an alternative to contemporary views which tend to minimize or reject the reality of the demonic and it retains the demonic as a viable theological category in the twenty first century
