emphasizing the vast changes in literary criticism that have occurred during the last thirty years h m daleski reexamines thomas hardy s novels in the novelist s own terms presenting a revisionary account of his treatment of gender he also shows that hardy was not as sexist as is asserted in much feminist criticism and that his female characters are sympathetically portrayed as the centers of his fictional worlds by carefully analyzing the novels daleski refutes the generally accepted reason for hardy s abandonment of fiction at the height of his powers claiming that he drove himself to a dead end in jude the obscure the typical hardy plot places a female protagonist in a love triangle with two male protagonists who are portrayed as polar opposites the woman contradicting a general view of her as victim is always granted the freedom of choice of a marriage partner she invariably makes the wrong choice which leads to a bad marriage and disastrous sexual relationships as this scenario is played out in most of hardy s novels the men are presented as distinct types the types being depicted with rich diversity and with steadily greater psychological depth hardy s rendering of sexuality in both his male and his female characters is marked by its originality and profundity in his intuitions about sexual relations daleski maintains hardy was not outdone by writers such as lawrence and joyce daleski studies hardy within his victorian context but he also shows that hardy both in his depiction of sexuality and in his technical innovations was in advance of his time in these respects hardy deserves to be regarded as a forerunner of the great modernists in thomas hardy and paradoxes of love daleski offers acute and thoughtful analyses of hardy s major novels avoiding

This book is a festschrift in honor of Professor Rod Fort, one of the leading contributors to the emerging field of sports economics in the past half century. Professor Fort's path-breaking research in the 1990s and 2000s both laid down an agenda for research in sports economics and popularized the application of economic analysis to sports issues for lay readers. The contributors to the volume are among the leading scholars in modern sports economics; they put issues highlighted in Professor Fort's research in the context of current issues. Topics discussed include competitive balance and outcome uncertainty estimation, gender wage discrimination in US professional soccer, and the paradox of fan loyalty.

Contradictions permeate and propel organizational life, including tensions between reaching globally while focusing locally, competing while also cooperating, performing reliably while experimenting, taking risks and learning or granting autonomy while constraining freedom. These tensions give organizational members pause but also spur them to take action they may be necessary for preserving the social order but are also required to transform it. Drawing on the eighth International Symposium on Process Organization Studies, *Dualities, Dialectics, and Paradoxes in Organizational Life* examines how contradictions fuel emergent dynamic systems and stimulate novelty, adaption, and transformations. It uses conceptual and empirical studies to offer insight into how process theorizing advances understanding of organizational contradictions to shed light on how dialectics, paradoxes, and dualities fuel persistence and transformation and to explore the convergence and divergence of dialectics, paradox, and dualities. Taken together, it offers key insights to inform persistent contradictory dynamics in organizations and organizational studies.

the mysteries of the church a materialistic scientist once announced to an astonished world are child s play compared with the mysteries of nature he was completely wrong of course yet there was every excuse for his mistake for as he himself tells us in effect he found everywhere in that created nature which he knew so well anomaly piled on anomaly and paradox on paradox and he knew no more of theology than its simpler and more explicit statements we can be certain therefore we who understand that the mysteries of nature are after all within the limited circle of created life while the mysteries of grace run up into the supreme mystery of the eternal and uncreated life of god we can be certain that if nature is mysterious and paradoxical grace will be incalculably more mysterious for every paradox in the world of matter in whose environment our bodies are confined we shall find a hundred in that atmosphere of spirit in which our spirits breathe and move those spirits of ours which themselves paradoxically enough are forced to energize under material limitations
