the purpose of this book is to offer a more systematic and structured treatment of the research on accounting based valuation with a primary focus on recent theoretical developments and the resulting empirical analyses that recognize the role of accounting information in making managerial decisions since its inception valuation research in accounting has evolved primarily along an empirically driven path in the absence of models constructed specifically to explain this topic researchers have relied on economic intuition and theories from other disciplines mainly finance and economics as a basis for designing empirical analyses and interpreting findings although this literature has shed important light on the usefulness of accounting information in capital markets it is obvious that the lack of a rigorous theoretical framework has hindered the establishment of a systematic and well structured literature and made it difficult to probe valuation issues in depth more recently however progress has been made on the theoretical front the two most prominent frameworks are i the linear information dynamic approach and ii the real options based approach which recognizes managerial uses of accounting information in the pursuit of value generation this volume devotes its initial chapters to an evaluation of the models using the linear dynamic approach and then provides a synthesis of the theoretical studies that adopt the real options approach and the empirical works which draw on them the book also makes an attempt to revisit and critique existing empirical research value relevance and earnings response studies within the real options based framework it is hoped that the book can heighten interest in integrating theoretical and empirical research in this field and play a role in helping this literature develop into a more structured and cohesive body of work value is of ultimate concern to economic decision makers and valuation theory should serve as a platform for studying other accounting topics the book ends with a call for increased links of other areas of accounting research to valuation theory

in this book the reader is introduced to the concepts of politics government political theory and political culture with reference to cameroon defined as human activity concerned with controversies over public questions and the resolution of those controversies politics is concerned with the affairs of government and because government action deeply affects us we take a lively interest in what governments do we form associations and organize campaigns to articulate our demands we negotiate with others and try to shape the goals that governments pursue when we disagree with the policies of the government we protest and organize demonstration to persuade our governments to change the existing laws we passionately debate the actions of our representatives in this way we look for the rationale underlying the prevalent chaos and decay and aspire to create a better world to sum up politics arises from the fact that we have different visions of what is just and desirable for us and our society politics exist because we possess reason and the ability to reflect on government actions and communicate our innermost thoughts and desires with each other political theory has its roots in these twin

aspects of the human being defined as a network of concepts and generalizations about political life involving ideas assumptions and statements about the nature purpose and key features of government political theory systematically thinks about the values that inform political life values such as freedom equality justice nationalism secularism development etc it explains the meanings and significance of these and other related concepts by focusing on some major political thinkers theologians kings economists sociologists popes etc of the past and present it also examines the extent to which freedom or equality are actually present in the institutions that we participate in everyday such as schools shops buses or trains or government offices and it looks at whether existing definitions and institutions are adequate or must be modified to become more democratic the objective of political theory is to train citizens to think rationally about political questions and assess correctly the political events of our time in applying political theory some countries are more successful than others due to the variations in political culture a country s degree of success in operating a governmental system that is democratic in character depends to a very large extent upon the nature and content of the political culture of that country for democracy to work the country s political culture must be compatible with and support the very concepts of constitutionalism the rule of law and representative democracy as well as be consistent with and sustain the country s established agreed upon constitution including the constitutionally prescribed procedures for managing and resolving controversy over public questions making and carrying out authoritative decisions on public policy protecting the rights and liberties of citizens and peacefully transferring governing authority from one group of political leaders to another in all discussions examples are drawn from cameroon and elsewhere in the world
