what made wayne gretzky the greatest hockey player of all time wasn't his speed on the ice or
the uncanny accuracy of his shots but rather his ability to predict where the puck was going to
be an instant before it arrived in other words it was gretzky's brain that made him exceptional
over the past fifteen years scientists have found that what distinguishes the greatest musicians
athletes and performers from the rest of us isn't just their motor skills or athletic abilities it is the
ability to anticipate events before they happen a great musician knows how notes will sound
before they're played a great CEO can predict how a business decision will turn out before it's
made a great chef knows what a recipe will taste like before it's prepared in a powerful narrative
that takes us from the research in the labs to the implementation of predictive technology inside
companies vivek ranadivé and kevin maney reveal how our understanding of human mastery is
being applied to the way computers think in the near future the authors argue the most
advanced computer systems and the most successful businesses will anticipate the future much
like wayne gretzky's brain does as a result companies will be able to use a new generation of
technology to anticipate customer needs before customers even know what they want and see
production snafus before they occur traffic jams before they materialize and operational
problems before they arise forward thinking companies will be able to predict the future just a
fraction ahead of everyone else with a little bit of the right information at the right time what the
authors call the two second advantage and it will transform the way businesses are run and offer
companies an enormous competitive edge in the marketplace in the bestselling tradition of blink

sway and how we decide the two second advantage will change our understanding of what makes a company successful

this book is specially written for ugc net jrf commerce examination the book consists of a chapter wise bifurcation of the previous year s question paper of ugc net jrf since 2005 and covers a large number of questions for practice asked in different examinations special feature of this book self study and online classes series the book is divided into small chapters the book is prepared on the basis of ugc net jrf standard each chapter is supported by a large number of questions such as previous year s net jrf examination questions other different different levels of examinations questions and questions prepared by our subject expert faculty unit wise chapter wise material
