indian agriculture clearly needs change the green revolution s momentum has been lost with stagnation even crisis setting in how will this change come about by thinking of agriculture beyond the wheat rice and cotton tobacco framework from irrigation and fertiliser to innovative farming practices credit and infrastructure to farmer distress marketing and pricing to climate change poultry and rabbit farming to horticulture and floriculture this book provides a fresh construct for agricultural growth

agriculture is a major source of rural employment and plays a crucial role in the economic development of india the state of indian agriculture examines the present scenario of indian agriculture and studies the trends at national as well as state level the overall objective of the book is to analyze the impact of climate change on indian agriculture and its implications for food security the book recommends strategies to enhance productivity and the adoption of climate smart practices to promote sustainable agriculture thereby ensuring food security in india it argues that there is an urgent need for a holistic and strategic approach to mitigate the challenges of climate change

this book presents an extensive study on india s agricultural and nonfarm sectors examining prices investments and policies and suggesting various essential technological changes it offers appropriate financial institutional and policy frameworks that can help to sustain agricultural growth and augment farmers incomes across geographical locations further it addresses agricultural growth and rural poverty reduction through multiple pathways that also tackle varied geographical locations making it a highly useful guide to understanding the changing contours in agriculture and rural areas across the country and among rural households with various social and economic backgrounds

this edited book focus on highlighting the evolution of indian agriculture over the past 75 years of independence covering every sector viz crop science horticulture management of biotic abiotic stress post harvest quality management livestock fisheries mechanization marketing and human resource development the book has 30 chapters from most experienced researchers and academicians who are actively engaged in research work on the subject area of the book the book is in line with the strategy for new india 75 brought out by niti ayog it highlights

india's success stories in innovation, technology, enterprise, and efficient management together to achieve overall growth while making available food, required nutrition, and other ecological services. It also assesses the india's preparedness in terms of commitment toward sustainable development goal SDG. The book is a relevant reading material for both students and researchers and policy makers.

Agriculture and allied sectors unquestionably are considered to be the largest source of livelihood in india, contributing largely to the GDP of the country. However, despite a significant increase in the production of food grains, the agriculture sector has been facing innumerable challenges primarily because of its dependency on natural resources which have shrunk due to increasing demographic and socioeconomic pressures. This book, a study assigned by the Ministry of Agriculture, studies different facets of agriculture and allied sectors. It provides an overview of indian agriculture and presents an analysis of its performance over the years, showcasing the issues faced in the development of agriculture. It captures the interventions and initiatives of the government for the development of indian agriculture.
