awarded an american legion scholarship i am also an award winning author and have published numerous articles and books having attended several colleges and universities eventually earning my ph d in human behavior i hold several life credentials in education earned during many years as an educator together with years spent working in the aerospace industry and other occupations but to call einstein s famous equation $E=mc^2$ incomplete because it does not account for life and death does seem quite extraordinary yet these remain the two greatest mysteries they have ever been denying us thus far a theory of everything the title of this book hey god what went wrong and when are you going to fix it is a perfectly legitimate question and one that often comes to the minds of most of us we know something animates life and departs with death but what this something is not all our science has yet discovered though things like the large hadron collider may provide needed insight and it has been in the pursuit of knowledge about these two greatest mysteries that has compelled me into so many varied academic studies and careers attempting to make sense of the world and our place in it and how people think and deal with the issues of life and death philosophically religiously and politically the things i have discovered along

the way compelled me to much research and speculation about these mysteries and how they impact our lives to communicate my thoughts about them to others but there are many things some of them terribly wrong which we wish god would intervene and set right and question why he does not some years ago i removed from the greater part of society to live in semi seclusion alone with my books and thoughts in a quiet part of the sequoia national forest devoting myself to contemplation speculating about many things and committing my thoughts in writing fulltime as a writer and author given to much introspection and fascinated by human behavior nature and our universe it was important to me to simplify my life as much as possible as anyone given to philosophical speculation about many things must that much of my writing covers some metaphysical thoughts about god angels and demons an afterlife and biblical stories of origins of prophecies of the end times and so much more have been absorbing studies as well and i freely share my thoughts about these in this volume

adolf hitler s great war military experiences in no way qualified him for supreme command yet by july 1940 under his personal leadership the third reich s armed forces had defeated poland czechoslovakia holland denmark norway belgium and france the invasion of great britain was a distinct reality following dunkirk hungary bulgaria and romania had become allies along with the acquiescent military powers of mussolini s italy and franco s spain these achievements prompted field marshal willem keitel the wehrmacht s chief of staff to pronounce hitler to be the greatest commander of all time storm clouds were gathering most notably the disastrous decision to tear up the treaty with the soviet union and launch operation barbarossa in 1941 as described in this meticulously researched and highly readable book hitler s blind ideology racist hatred and single mindedness led him and his allies inexorably to devastating defeat how far was it good luck that gave hitler his sensational early political and military successes certainly fortune played a major role in his survival from many assassination attempts and sex scandals the author concludes from 1941 onwards the fuhrer s downfall was entirely attributable to military misjudgments that he alone made lucky hitler s big mistakes exposes the enigmatic dictator for what he really was incredibly lucky and militarily incompetent

but you must not eat from the tree of the knowledge of good and evil for when you eat of it you will surely die gen 2 17 why would god put that troublesome tree in the garden of eden he must have known the childlike adam and eve would give in to temptation especially with that old serpent slithering around maybe that was the divine

plan from the start for what would be the most interesting saga an endless summer of adam and family playing with docile lions and feasting on low hanging fruit or a tortuous slog through centuries that eventually lifted humanity from hunter gatherers to astronauts this little book attempts to offer an alternate view of satan in which he was not only a vengeful rebel against the cosmic divine will but unwittingly served as the restless malcontented spark that ignited much of human progress through the ages

whether ghosts astrology or esp up to 80 per cent of the population believes in one or more aspects of the paranormal such beliefs are entertaining and it is tempting to think of them as harmless however there is mounting evidence that paranormal beliefs can be dangerous cases of children dying because parents rejected orthodox medicine in favour of alternative remedies and psychics who trade on the grief of the bereaved for personal profit and gain expenditure on the paranormal runs into billions of dollars each year in beyond belief skepticism science and the paranormal martin bridgstock provides an integrated understanding of what an evidence based approach to the paranormal a skeptical approach involves and why it is necessary bridgstock does not set out to show that all paranormal claims are necessarily false but he does suggest that we all need the analytical ability and critical thinking skills to seek and assess the evidence for paranormal claims
