jasanoff comes up with some of the strongest arguments yet made for assuming that indo european languages other than hittite and tocharian underwent a substantial period of common development and this needs to be fitted into any model of the dispersal of the language family james clackson times literary supplement d 05 03 2004 this book reconciles what is known of the proto indo

European verbal system with the evidence of Hittite and the other early Anatolian languages the decipherment of Hittite in 1917 and the recognition that it was an Indo-European language had dramatic consequences for conceptions of the Indo-European parent language for most of the twentieth century attention focused on the peculiarities of Hittite phonology especially the consonant *h* and its implications for the evolving laryngeal theory yet the morphological disconnects between Hittite and the other early languages are more profound than the phonological differences the Hittite verbal system lacks most of the familiar tense aspect categories of Sanskrit Greek and Latin it also presents the novelty of the *hi* conjugation a purely formal conjugation class to which nearly half of all Hittite verbs belong repeated attempts to explain the *hi* conjugation on the basis of the classical model of the Proto-Indo-European verbal system have failed the question is not whether the conventional picture of the parent language must be modified to account for the facts of Hittite but how in this outstanding book Professor Jasanoff puts forward a new and revolutionary model of the Proto-Indo-European verbal system that promises to have a major impact on Indo-European studies his strikingly original synthesis reflecting a quarter century long study of the problem is the most thorough and systematic attempt thus far to bridge the gap between Hittite and the other Indo-European languages

Corruption Party and Government in Britain 1702-1713 offers an innovative and original reinterpretation of state formation in eighteenth-century Britain reconceptualising it as a political and fundamentally partisan process focussing on the supply of funds to the army during the War of the Spanish Succession 1702-13 it demonstrates that public officials faced multiple incompatible demands but that political partisanship helped to prioritise them and to hammer out settlements that embodied a version of the national interest these decisions were then transmitted to agents in overseas through a mixture of personal incentives and partisan loyalties which built trust and turned these informal networks into instruments of public policy however the process of building trust and supplying funds laid officials and agents open to accusations of embezzlement fraud and financial misappropriation in particular although successive financial officials ran entrepreneurial private financial ventures that enabled the army overseas to

avoid dangerous financial shortfalls they found it necessary to cover the costs and risks by receiving illegal gratifications from the regiments reconstructing these transactions in detail this book demonstrates that these corrupt payments advanced the public service and thus that corruption was as much a dispute over ends as means ultimately this volume demonstrates that state formation in eighteenth century britain was a contested process of interest aggregation in which common partisan aims helped to negotiate compromises between various irreconcilable public priorities and private interests within the frameworks provided by formal institutions and then collaboratively imposed through overlapping and intersecting networks of formal and informal agents
