excerpt from the theta phi diagram practically applied to steam gas oil air engines in the following pages an attempt has been made to present in as simple and practical a manner as possible the use of the temperature entropy diagram and the various methods of drawing it for different heat motors that the subject presented peculiar difficulties because of its unfitness for presentation in a popular manner will readily be granted but i venture to think that one of the principal reasons for the lack of knowledge upon the subject by draughtsmen steam students and others has been the want of an elementary work not overcrowded with mathematics most of the literature upon the subject has presented the mathematical rather than the graphical side of the question with the result that students have become afraid of tackling what they believe to be an intricate mathematical investigation of the utility of the temperature entropy diagram in representing the various thermal changes which take place in all heat motors there cannot be any doubt to quote only one authority mr mark h robinson in the discussion on mr willans last paper said up to a certain point the practical man might ignore the present paper and others like it but if he aspired to design economical

steam engines he might derive more good from the study of say mr macfarlane gray's indicator diagram than from many portfolios of working drawings where authorities have been quoted or made use of the particulars are given in the text but i will take this opportunity of expressing my indebtedness to professor ewing for his work on the steam engine and other heat engines and his cantor lectures on the mechanical production of cold to professor boulvin for his articles in la revue de mecanique and to various papers principally those by the late mr p w willans and mr macfarlane gray published in the proceedings of the institutions of civil and mechanical engineers i also wish to thank the council of the latter institution for permission to reproduce some of the indicator diagrams and figures given in the reports of the steam jacket research committee about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

When people should go to the book stores, search instigation by shop, shelf by shelf, it is in fact problematic. This is why we present the book compilations in this website.
