the institute of food technologists 1ft sponsors each year a two day short course that covers a topic of major importance to the food industry hazard analysis and critical control points was the title for the short course which was held may 31 june 1 1991 immediately prior to the 51st annual 1ft meeting these short courses have been published as a proceedings in previous years however the current and future importance of the hazard analysis and critical control point haccp system prompted publication of the 1991 short course as a book this book is designed to serve as a reference on the principles and application of haccp for those in quality control assurance technical management education and related areas who are responsible for food safety management the national advisory committee on microbiological criteria for foods nacmcf published in november 1989 a pamphlet titled haccp principles for food production appendix a this document dealt with haccp as applied to the microbiological safety of foods however the principles can be modified to apply to chemical physical and

other hazards in foods the principles recommended by the nacmcf have been widely recognized and adopted by the food industry and regulatory agencies implementation of these principles provides a proactive preventive system for managing food safety haccp should be applied at all stages of the food system from production to consumption

food safety is an increasingly important issue numerous foodcrises have occurred internationally in recent years the use of the dye sudan red i the presence of acrylamide in various fried and baked foods mislabelled or unlabelled genetically modified foods and the outbreak of variant creutzfeldt jakob disease originating in both primary agricultural production and in the food manufacturing industries public concern at these and other events has led government agencies to implement a variety of legislative actions covering many aspects of the food chain this book presents and compares the haccp and iso 22000 2005 food safety management systems these systems were introduced to improve and build upon existing systems in an attempt to address the kinds of failures which can lead to food crises numerous practical examples illustrating the application of iso 22000 to the manufacture of food products of animal origin are presented in this extensively referenced volume after an opening chapter which introduces iso 22000 and compares it with the well established haccp food safety management system a summary of international legislation relating to safety in foods of animal origin is presented the main part of the book is divided into chapters which are devoted to the principle groups of animal derived food products dairy meat poultry eggs and seafood chapters are also included on catering and likely future directions the book is aimed at food industry managers and consultants government officials responsible for food safety monitoring researchers and advanced students interested in food safety

the institute of food technologists ift sponsors each year a two day short course that covers a topic of major importance to the food industry hazard analysis and critical control points was the title for the short course which was held may 31 june 1 1991 immediately prior to the 51st annual ift meeting these short courses have been published as a proceedings in previous years however the current and future importance of the hazard analysis and critical control point haccp system prompted publication of the 1991 short course as a book this book is designed to serve as a reference on the principles and application of haccp for those in quality control assurance technical management education and related areas who are responsible for food safety management the national advisory committee on microbiological criteria for foods nacmcf published in november 1989 a pamphlet titled haccp principles for food production appendix a this document dealt with haccp as applied to the microbiological safety of foods however the principles can be modified to apply to chemical physical and other hazards in foods the principles recommended by the nacmcf have been widely recognized and adopted by the food industry and regulatory agencies implementation of these principles provides a proactive preventive system for managing food safety haccp should be applied at all stages of the food system from production to consumption

in the last three decades haccp has been developed as the reference method for food safety assurance systems and still remains at the heart of food safety management although haccp has certainly contributed to the improvement of food safety in the world a number of misconceptions and failures have been experienced in its application and have prevented full benefits being drawn from its application this chapter presents the fundamentals of haccp together with experienced misconceptions and shortcomings in its implementation in particular it puts emphasis on the validation verification and maintenance of haccp plans

the hazard analysis and critical control point haccp system has now become generally accepted as the key safety management system for the food industry worldwide whilst there are numerous publications on its principles and methods of implementation there are relatively few on the experience of those who have actually implemented haccp systems in practice and what can be learnt from that experience edited by two leading authorities on the

subject and with an international team of contributors making the most of haccp describes that experience and what it can teach about implementing and developing haccp systems effectively
