how digital technology is profoundly renewing our sense of what is real and how we perceive digital technologies are not just tools they are structures of perception they determine the way in which the world appears to us for nearly half a century technology has provided us with perceptions coming from an unknown world the digital beings that emerge from our screens and our interfaces disrupt the notion of what we experience as real thereby leading us to relearn how to perceive in being and the screen stéphane vial provides a philosophical analysis of technology in general and of digital technologies in particular that relies on the observation of experience phenomenology and the history of technology epistemology he explains that

technology is no longer separate from ourselves if it ever was rather we are as much a part of the machine as the machine is part of us vial argues that the so called difference between the real and the virtual does not exist and never has we are living in a hybrid environment which is both digital and nondigital online and offline with this book vial endows philosophical meaning to what we experience daily in our digital age in a short treatise on design vial offers a concise introduction to the discipline of design not a history book but a book built of philosophical problems developing a theory of the effect of design this book is published with the support of the university of nîmes france

an increasing amount of research is being developed in the area where technology and humans meet the success or failure of technologies and the question whether technology helps humans to fulfill their goals or whether it hinders them is in most cases not a technical one user perception and influencing factors of technology in everyday life addresses issues of human and technology interaction the research in this work is interdisciplinary ranging from more technical subjects such as computer science engineering and information systems to non technical descriptions of technology and human interaction from the point of view of sociology or philosophy this book is perfect for academics researchers and professionals alike as it presents a set of theories that allow us to understand the interaction of technology and humans and to put it to practical use

tools and technologies have long complemented and extended our physical abilities from pre historic spearheads to steam propelled ploughs and high tech prosthetics while the development of lenses granted us insights into the micro and macrocosms new sensors and technologies increasingly augment our cognitive abilities including memory and perception this book integrates current research efforts results and visions from the fields of computer science neuroscience and psychology it provides a comprehensive overview of the state of the art and future applications of how technologies assist and augment human perception and cognition experts in the field share their research and findings on working memory enhancements digitization of memories through lifelog archives the consequences of technology induced disruptions and forgetting the creation and utilization of new human senses ethical and security concerns that arise with augmentation technologies as technology weaves itself ever deeper into our lives careful examination of its capabilities risks and benefits is warranted while this book focuses on the complementation and augmentation of human capabilities it serves as a foundation for students researchers and designers of technologies that push the boundaries of perception and cognition

explains the purpose of a technology strategy and the need for its integration with other business policies

this book takes the interface or rather to interface a process rather than a discrete object or location as a concept emblematic of our contemporary embodied relationship with technological artefacts the fundamental question addressed by this book is how can we understand what it

means to perceive or act upon the world as a body artefact assemblage black works to clarify the role of artefacts of all kinds in human perception and action then considers the ways in which new digital technologies can expand and transform this capacity to change our mode of engagement with our environment throughout the discussion is grounded in specific technologies some already familiar and some still in development e g new virtual reality and brain machine interface technologies natural user interfaces etc in order to develop a detailed generalizable theory of how we interface with technology black assembles an analytical toolkit from a number of different disciplines including media theory ethology clinical psychology cultural theory philosophy science and technology studies cultural history aesthetics and neuroscience

the digital age we now live in is fundamentally changing how we relate to our perceptions and images daniel o shiel provides the first comprehensive phenomenology of virtual technology in order to show how the previously well established experiential lines and structures between three basic categories of phenomenal experience our everyday perceptions of reality our everyday fantasies of unreality and our everyday engagements with external images not least digital ones are becoming blurred inverted or are even collapsing in a new era where a specific type of virtuality is coming to the fore o shiel examines in depth just what this means for the phenomenology behind it as well as the concrete practical consequences going forward the work is divided into two main parts in the first o shiel fully investigates the phenomenological natures of perception and imagination through close textual analyses of the relevant works by edmund husserl eugen fink and jean paul sartre in each phenomenologist perception and imagination are ultimately seen as different in kind although the dividing line differs especially with reference to a middle category of image consciousness bildbewusstsein this first part argues for basic phenomenological differences between perceptions physical and external images and more mental imagery while also allowing for a more general gradation between them the second part then applies these theoretical findings to some of the most influential virtual technologies today social media online gaming and some virtual augmented and mixed reality technologies in order to show how previously clear categories of real and unreal present and absent genuine and fake and even true and false are becoming less so
