first published in 1999 routledge is an imprint of taylor francis an informa company

originally published in 1983 the purpose of this book was to discuss the relations between philosophy and developmental psychology as those relations existed over the course of the history of the discipline and as they existed at that time although not all portions of developmental psychology are surveyed major proponents of several key areas are represented e g organismic developmental theory stage theory life span developmental psychology and the ecological approach to development in addition discussion of many currently prominent issues are included e g constancy and change in human development the use of multivariate models and methods the role of the context in individual development and the use of developmental theory in public policy and political arenas the diversity of approaches and of interests present in the book are representative of the breadth of theoretical and empirical interests found in developmental psychology at the time

originally published between 1928 and 1987 the volumes in this set provide an interesting look back at how psychology has developed as a discipline and some of the problems it has encountered along the way it includes volumes focusing on the history of specific fields such as developmental and experimental psychology as well as examining the roots of psychological theory as a whole and how it has informed many of the fields of psychology we know today

newman and newman use a chronological approach to present development across the life span drawing on the psychosocial theory of erik erikson to provide a conceptual framework for the text the authors address physical intellectual social and emotional growth in all life stages focusing on the idea that development results from the interdependence of these areas at every stage and placing special emphasis on optimal development through life

an introductory text that tackles controversial issues in an accessible way and which will be of interest to psychologists across a range of fields

part of the authoritative four volume reference that spans the entire field of child development and has set the standard against which all other scholarly references are compared updated and revised to reflect the new developments in the field the handbook of child psychology sixth edition contains new chapters on such topics as spirituality social understanding and non verbal communication volume 1 theoretical models of human development edited by richard m lerner tufts university explores a variety of theoretical approaches including life span life course theories socio culture theories structural theories object relations theories and diversity and development theories new chapters cover phenomenology and ecological systems theory positive youth development and religious and spiritual development

the entire lifespan in 500 pages what s the greatest challenge in teaching the life span development course covering a lifetime of material in a single term instructors from across the country have clamored for a streamlined text that captures the core concepts of life span development essentials of life span development was carefully designed and constructed to deliver these core concepts along with a strong applications focus reflecting the broad range of interests and backgrounds of students taking this course and as always with john santrock s texts the latest research in the field is incorporated throughout

this reference has been written by an international team of contributors presenting a global understanding of the key issues within social sciences a board of advisory editors

has worked closely with the editors in determining the most important concepts thinkers and techniques in each field

the handbook is an impressive collection of research studies and theories provided by knowledgeable contributors on life span development from conception to old age anthropology and aging quarterly the doubling of our average life span since the turn of the 20th century is considered by many scholars to be one of the most important changes in human existence this definitive text is the only volume to fully address through a multidisciplinary perspective the biological cognitive and psychological development that occurs from infancy through old age and how the sociocultural and institutional factors interface with these changes edited by leading research scholars in the field of life span development the volume also includes contributions of specialists in behavioral genetics socioemotional selectivity theory neuroscience ecological models and more it examines the dynamics of close relationships and informal ties among the elderly population child parent attachment relationships as a life span phenomenon developmental tasks across the lifespan continuity and discontinuity in temperament and personality the sociocultural context of cognition across the life span and variability in approaches to social problem solving from early to later life given the number of recent demographic shifts it also explores issues related to fertility life expectancy environmental contexts technology immigration and public policy key features integrates the full life span from infancy through old age in each chapter considers multidisciplinary perspectives that address personal relationships cognitive development and social emotional and physical health across the life span situates life span development in ecological contexts e g socioeconomic neighborhood and immigration status provides a concise but thorough resource for graduate seminars in life span related studies highlights future issues in all areas of life span study

this book places career development into the mainstream of human development research and theory the result is a powerful synthesis of vocational psychology and the most recent advances in lifespan developmental psychology thus offering a developmental contextual framework for guiding theory and research in career development its chapters demonstrate the utility of this framework for the study of women s career development health and careers career intervention and the selection and application of appropriate research methodologies scholars as well as intervention specialists should find this volume to be of great value the adaption of this developmental contextual framework for career development theory research and intervention may represent an important future for vocational psychology and the study of career development

the final volume in this significant series this publication mirrors the broad scientific attention given to ideas and issues associated with the life span perspective constancy and change in human development opportunities for and constraints on plasticity in structure and function across life the potential for intervention across the entire life course and thus for the creation of an applied developmental science individual differences diversity in life paths in contexts or the ecology of human development and in changing relations between people and contexts interconnections and discontinuities across age levels and developmental periods and the importance of integrating biological psychological social cultural and historical levels of organization in order to understand human development

life span developmental psychology personality and socialization presents papers on personality and socialization the book discusses the history theory and psychological

approaches of developmental psychology with focus on socialization and personality development through the life span personality dimensions and theories of socialization and sex role development the text also describes the life span perspective of creativity and cognitive styles continuities in childhood and adult moral development revisited and issues of intergenerational relations as they affect both individual socialization and continuity of culture the interactional analysis of family attachments social learning theory as a framework for the study of adult personality development person perception research and the perception of life span development are also considered the book further tackles the potential usefulness of the life span developmental perspective in education the strategies for enhancing human development over the life span through educational intervention and some ecological implications for the organization of human intervention throughout the life span developmental psychologists sociologists gerontologists and people involved in the study of child development will find the book invaluable
