mathematics for economists a new text for advanced undergraduate and beginning graduate students in economics is a thoroughly

modern treatment of the mathematics that underlies economic theory

computable foundations for economics is a unified collection of essays some of which are published here for the first time and all of which have been updated for this book on an approach to economic theory from the point of view of algorithmic mathematics by algorithmic mathematics the author means computability theory and constructive mathematics this is in contrast to orthodox mathematical economics and game theory which are formalised with the mathematics of real analysis underpinned by what is called the zfc formalism i e set theory with the axiom of choice this reliance on ordinary real analysis and the zfc system makes economic theory in its current mathematical mode completely non algorithmic which means it is numerically meaningless the book provides a systematic attempt to dissect and expose the non algorithmic content of orthodox mathematical economics and game theory and suggests a reformalization on the basis of a strictly rigorous algorithmic mathematics this removes the current schizophrenia in mathematical economics and game theory where theory is entirely divorced from algorithmic applicability for experimental and computational exercises the chapters demonstrate the uncomputability and non constructivity of core areas of general equilibrium theory game theory and recursive macroeconomics the book also provides a fresh look at the kind of behavioural economics that lies behind herbert simon s work and resurrects a role for the noble classical traditions of induction and verification viewed and formalised now algorithmically it will therefore be of particular interest to postgraduate students and researchers in algorithmic economics game theory and classical behavioural economics

a comprehensive four volume resource that explains more than 800 topics within the foundations of economics macroeconomics microeconomics and global economics all presented in an easy to read format as the global economy becomes increasingly complex interconnected and therefore relevant to each individual in every country it becomes more important to be economically literate to gain an understanding of how things work beyond the microcosm of the economic needs of a single individual or family unit this expansive reference set serves to establish basic economic literacy of students and researchers providing more than 800 objective and factually driven entries on all the major themes and topics in economics written by leading scholars and practitioners the set

congenital malformations are worldwide occurrences striking in every condition of society these severe physical abnormalities which are present at birth and affecting every part of the body happen more often than usually realized once in every 33 births the most common after heart defects are those of the neural tube the brain and spinal cord which happen in as many as one in every 350

births they have been noted as curiosities in man and beast throughout recorded history and received great attention in our time by various fields of study for example their faulty prenatal development by embryologists familial patterns by geneticists causation by environmentalists and variability by population scientists attention turned much in recent years to the relation of these malformations to deficiency of a particular dietary ingredient folic acid a subject this book analyzes in depth the greatest conundrum of all which this latest matter like so much else hinges on is the amazing fact of the tremendous almost universal decrease in the frequency of these anomalies since early in the 20th century the puzzle is what can this downward trend possibly mean and at bottom whether it is part of a long term cyclical pattern this fascinating biological phenomenon is explored in the book together with various other topics

contains papers that appeal to a broad and global readership in all fields of economics

no detailed description available for economic materialism and social moralism

this wide ranging collection charts the responses of the economics discipline to these changes initially slowly but with gathering pace as communication and information have moved from the sidelines to centre stage
