engineers are changemakers who play a critical role in solving the grand challenges facing humanity and its role will be even more important in the coming decades balancing gender representation in the field is a necessity for innovations to continue to evolve and to ensure engineering advancements include all members of society rising to the top provides an intimate and inspiring look into the experiences that have shaped the lives and careers of women engineering leaders from around the world from sudan to chile to malaysia and many points in between by openly sharing their personal journeys in these pages the authors hope to inspire the next generation of engineering leaders and provide valuable insight into the challenges facing women engineers around the world and the opportunities that are theirs for the taking rising to the top makes it clear that women engineering leaders are not only essential for the advancement of all societies they are here to stay

this book proposes new technologies and discusses future solutions for ict design infrastructures as reflected in high quality papers presented at the 6th international conference on ict for sustainable development ict4sd 2021 held in goa india on 5 6 august 2021 the book covers the topics such as big data and data mining data fusion iot programming toolkits and frameworks green communication systems and network use of ict in smart cities sensor networks and embedded system network and information security wireless and optical networks security trust and privacy routing and control protocols cognitive radio and networks and natural language processing bringing together experts from different countries the book explores a range of central issues from an international perspective

the book is compilation of technical papers presented at international research symposium on computing and network sustainability irscns 2016 held in goa india on 1st and 2nd july 2016 the areas covered in the book are sustainable computing and security sustainable systems and technologies sustainable methodologies and applications sustainable networks applications and solutions user centered services and systems and mobile data management the novel and recent technologies presented in the book are going to be helpful for researchers and industries in their advanced works

proceedings of a conference held in beijing aug 1988 comprises some 120 papers by contributors from various countries recently this subject has attracted increasing attention and interest among geotechnical engineers and researchers in countries where problems were encountered in construction works this volume reports the latest developments i

fluid bed technology in materials processing comprehensively covers the various aspects of fluidization engineering and presents an elaborate examination of the applications in a multitude of materials processing techniques this singular resource discusses all the basic aspects of fluidization essential to understand and learn about various techniques the range of industrial applications several examples in extraction and process metallurgy fluidization in nuclear engineering and nuclear fuel cycle with numerous examples innovative techniques and several advanced concepts of fluidization engineering including use and applications in materials processing as well as environmental and bio engineering pros and cons of various fluidization equipment and specialty of their applications including several examples design aspects and modeling topics related to distributors effects and flow regimes a separate chapter outlines the importance of fluidization engineering in high temperature processing including an analysis of the fundamental concepts and applications of high temperature fluidized bed furnaces for several advanced materials processing techniques presenting information usually not available in a single source fluid bed technology in materials processing serves fluidization engineers practicing engineers in process metallurgy mineral engineering and chemical metallurgy researchers in the field of chemical metallurgical nuclear biological environmental engineering energy engineering professionals high temperature scientists and engineers students and professionals who adopt modeling of fluidization in their venture for design and scale up

finding natural substances is worthwhile in food preservation the principal motivation behind this edited volume antimicrobials for sustainable food storage is to collect and present widespread knowledge in the domain of sustainable food ingredients with antimicrobial properties the book consists of two sections the first section of this volume is about food ingredients as antimicrobials and the second section discusses the recent advances in the applications of food ingredients interplay of various environmental factors favors

the growth of different microorganisms during the food preservation process growth of undesirable microorganisms negatively influences the taste smell color and texture of food therefore sustainable food preservation is a challenging issue though several chemicals have emerged inevitable health effects are commonly encountered by food preserve chemicals microbial products nisin enterocin pentosin sakacin and pediocin have immense importance in prolonging the shelf life of food substances by controlling food spoilage and pathogenic microbes yeasts and cyanobacteria are also potential candidates in the supply of food ingredients with significant antimicrobial properties however limited awareness of antimicrobials as food ingredients and the unavailability of a single source of the latest insights on such food ingredients in one place led to the motivation to produce this work key features provides insights on natural antimicrobials in food preservation underlines the importance of sustainable food packaging offers knowledge on emerging trends in antimicrobial based food storage diverse applications are covered in different chapters this book covers various antimicrobials as food preservatives such as metabolites natural products essential oils nanomaterials l arginine polyphenols phaeophyceae and horchata there are also chapters that focus on the applicability and prospective studies of essential oils edible biofilms biodegradable antimicrobials and nanostructured lipid carriers in the food sector and the method for encapsulation of antimicrobials

powder metallurgy characterization processing and optimization techniques explores the evolving role of powder metallurgy in producing parts for various applications this comprehensive text focuses on the tribological performances of powder metallurgy materials it delves into processes such as sintering electrolytic methods atomization techniques cold compaction and cold isostatic pressing alongside techniques for measurement testing and characterization moreover the book covers sustainability in powder metallurgy and the use of artificial intelligence for modeling and optimizing the process applications span across aerospace defense automotive consumer products industrial products and more discusses various powder metallurgy industry applications in areas such as aerospace defense automotive consumer products industrial products and more focuses on the effect of critical process parameters on the microstructure and mechanical properties of the resulting part includes discussions on titanium aluminum iron and nickel based alloys inconel 718 and more covers sustainability automation and optimization of powder metallurgy processes outlines measurement testing and characterization techniques of powder particles

this volume constitutes the proceedings of the 10th ifip wg 8 1 conference on the practice of enterprise modeling held in november 2017 in leuven belgium the conference was created by the international federation for information processing ifip working group 8 1 to offer a forum for knowledge transfer and experience sharing between the academic and practitioner communities the 20 full papers and 4 short papers accepted were carefully reviewed and selected from 70 submissions they include research results practitioner experience reports and work in progress papers and were presented in 8 sessions covering diverse topics related to enterprise modelling and its application in practice
