gender and education in kenya explores the intersections of curriculum pedagogy policy and gender the contributors
 study depictions of gender in textbooks the presence and roles of girls and women within classrooms in kenya and
 female leadership in education arguing that despite recent policies put in place by the kenyan government to ensure
 gender parity in education there is still a need to make curriculum more gender responsive gender and education in
 kenya examines the disparity between male and female representation in education and advocate for more training for
 teachers about gender related educational policies and implementing gender responsive objectives in classrooms the
 collection concludes with a study of the intersection of gender and disability with a chapter that explores the additional
 challenges for a blind girl in school and the lack of policies in place to help disabled students

why a book on gender issues in mathematics in the 21st century several factors have influenced the undertaking of this
 project by the editors first an international volume focusing on gender and mathematics has not appeared since
 publication of papers emerging from the 1996 international congress on mathematical education keitel 1998 surely it
 was time for an updated look at this critical area of mathematics education second we have had lively discussion and
 working groups on gender issues at conferences of the international group for the psychology of mathematics
 education pme for the past four years sessions at which stimulating and ground breaking research has been discussed
 by participants from many different countries some publication seemed essential to share this new knowledge
 emerging from a wider variety of countries and from different cultural perspectives third some western countries such
 as australia and the usa have experienced in recent years a focus on the boy problem with an underlying assumption
 that issues of females and mathematics have been solved and are no longer worthy of interest thus it seemed timely to

look more closely at the issue of gender and mathematics internationally when the idea for this volume first emerged invitations were issued to those regularly attending the working and discussion groups at pme potential authors were charged to focus on gender issues in mathematics and were given wide scope to hone in on the issues that were central to their own research efforts or were in receipt or in need of close attention in their own national or regional contexts

using data from surveys conducted in a department store and a supermarket kimoto discusses the forces shaping job segregation by gender one of the main themes is the need for japanese women s labor studies to develop the theoretical and methodological momentum required for a fuller analysis of paid work using a gender perspective kimoto stresses the need for empirical studies to reveal the realities of workforce conditions and of job segregation by gender this is linked to another major theme the need to escape from the tendency of japanese labor studies researchers and those working in japanese personnel offices to think of women as necessarily disadvantaged participants in the labor market because of their household and child rearing duties kimoto shows that this thinking serves only to prevent one from seeing how gender norms and therefore gender relations actually develop in workplaces a clear picture emerges of the reasons for women s difficulties in moving beyond the lower levels of management
