this examination of the 1991 uprisings in Iraq demonstrates how external intervention by the UN and other actors in ethnic conflicts has contributed to the problems with democratization experienced in the post Saddam era

Iraq has dominated headlines in contemporary times but its controversial role in international affairs goes back much further this book presents an understanding of one of

the most persistent crises in international affairs and the various roles the world's central peace making forum has played in it

if i had the power to do so i would make this book compulsory reading for all who exercise political power in our world today instead i will keep my fingers crossed that it will be read by as many members of congress and of the current us administration as possible and by a wide cross section of policy analysts diplomats academics and human rights defenders mary robinson former un high commissioner for human rights wars on terrorism and iraq provides a timely and critical analysis of the impact of the wars on terrorism and iraq on human rights particularly internationally as well as related tensions between unilateralism and multilateralism in us foreign policy the distinguished contributors examine the consequences for international relations and world order of the traditional standard bearer for human rights and democracy the united states appearing not to be championing the rule of law and negotiated conflict resolution the authors also suggest effective policies to promote greater fulfilment of human rights in order to achieve peaceful accord within nations and stability internationally

political instability has characterised the modern history of iraq which has proven itself as a complex state to govern however the creation of a federal system in 2005 offers the potential for change and a deviation from a past characterised by authoritarian government brutality and war the iraqi federation explores why and how iraq became a federal state and analyses how the process of formation impacts on the operation of the iraqi federal system it argues that the different approaches taken by various federal theorists in the past particularly william h riker's bargain theory are insufficient to explain the formation of the iraqi federation completely the process of the establishment of a federal iraq must be understood in the context of its unique history and cultural specificity as well as in the context of the other new federal models that have appeared since the end of the cold war including belgium the russian federation ethiopia bosnia and herzegovina and nigeria drawing on interviews with contemporary political players in iraq this book helps to deepen our understanding of how one of the newest federal states operates in a practical sense by linking the new federal models to the classic federal theory it also provides a unique contribution to theories on federal state formation it will therefore be of great interest to students and scholars of middle east politics as well as those studying federalism

due to its primacy in explaining issues of war and peace in the international arena the discipline of international relations ir looms large in analyses of and responses to ethnic conflict in academia politics and popular media in particular with respect to contemporary conflicts in the middle east grounded in constitutive theory this book challenges how ethnic ethno nationalist conflict is represented in explanatory ir by deconstructing its most prominent state centric models frameworks and analytical

concepts as much a critique of contemporary scholarship on kurdis ethno nationalism as a detailed analysis of the most prominent kurdis ethno nationalist actors the book provides the first in depth investigation into the relations between the pkk and the main iraqi kurdis political parties from the 1980s to the present it situates this inquiry within the wider context of the ambiguous political status of the kurdis region of iraq its relations with turkey and the role kurdis parties and insurgencies play in the war against isis in iraq and syria appreciating these complex dynamics and how they are portrayed in western scholarship is essential for understanding current developments in the iraqi and syrian theatres of war and for making sense of discussions about a potential independent kurdis state to emerge in iraq iraqi kurdis provides a comprehensive and critical discussion of the state centric and essentialising epistemologies ontologies and methodologies of the three main paradigms of explanatory ir as well as their analytical models and frameworks on ethnic identity and conflict in the middle east and beyond it will therefore be a valuable resource for anyone studying ethnicity and nationalism international relations or middle east politics

foreign and security policy have long been removed from the political pressures that influence other areas of policymaking this has led to a tendency to separate the analytical levels of the individual and the collective using lacanian theory which views the subject as ontologically incomplete and desiring a perfect identity which is realised in fantasies or narrative scenarios this book shows that the making of foreign policy is a much more complex process emotions and affect play an important role even where hard security issues such as the use of military force are concerned eberle constructs a new theoretical framework for analysing foreign policy by capturing the interweaving of both discursive and affective aspects in policymaking he uses this framework to explain germany s often contradictory foreign policy towards the iraq crisis of 2002 2003 and the emotional even existential public debate that accompanied it this book adds to ongoing theoretical debates in international political sociology and critical security studies and will be required reading for all scholars working in these areas

this edited volume presents the foremost scholarly thinking on why the us invaded iraq in 2003 a pivotal event in both modern us foreign policy and international politics in the years since the us invasion of iraq it has become clear that the threat of weapons of mass destruction was not as urgent as the bush administration presented it and that saddam hussein was not involved with either al qaeda or 9 11 many consider the war a mistake and question why iraq was invaded a majority of americans now believe that the public were deliberately misled by the bush administration in order to bolster support for the war public doubt has been strengthened by the growing number of critical

scholarly analyses and in depth journalistic investigations about the invasion that suggest the administration was not candid about its reasons for wanting to take action against iraq this volume begins with a survey of private scholarly views about the war s origins then assesses the current state of debate by organising the best recent thinking by foreign policy and international relations experts on why the us invaded iraq the book covers a broad range of approaches to explaining iraq the role of the uncertainty of intelligence cognitive biases ideas israel and oil highlighting areas of both agreement and disagreement this book will be of much interest to students of the iraq war us foreign and security policy strategic studies middle eastern politics and ir security studies in general

this book critically analyses the topic of us led external interventions in the affairs of developing countries by using one of the most contested experiments of modern times namely the invasion of iraq and its aftermath the march 2003 invasion of iraq has so far failed to deliver the benefits and outcomes its supporters anticipated prompting international discussion as to whether the promises of externally led nation building as an attempt to mould rogue states in a democratic market friendly fashion are outweighed by the kinds of pitfalls and perils of intervention that have come to characterise the iraq experience this book identifies and addresses the major issues emerging from the current debate including the evolution of external interventionism as an idea an explanation of what went wrong in post saddam iraq and why the iraq experiment is flawed by the bush administration s refusal to address long standing political and historical grievances among muslims as part of the war on terror the contributors assess the troubled relationship between islam and the west the prospects for democracy in the middle east foreign policy debates in the us and how economics and politics are juxtaposed in a highly contentious manner in any project of externally driven nation building beyond the iraq war brings together scholars and practitioners in an attempt to move beyond the polemical dimensions of the existing debate and provide a balanced analysis of what the iraq enterprise can tell us about the brand of external interventionism espoused by the bush administration and also the lessons it holds for any future interventions into the affairs of states it combines a mix of disciplines most notably international relations and economics as well as theory and empirical evidence the book is written in a non technical but rigorous manner in order to make complex and diverse issues accessible to the general reader this fascinating and scholarly work will appeal to academics and scholars in the fields of political economics political science and international relations policymakers journalists and media commentators will also find this work to be of great interest and value

how is foreign policy made in iraq based on dozens of interviews with senior officials and politicians this book provides a clear analysis of the development of domestic iraqi politics since 2003 zana gulmohamad explains how the federal government of iraq and kurdistan regional government krg have functioned and worked together since toppling saddam to reveal in granular detail the complexity of their foreign policy making the book shows that the ruling elites and political factions in baghdad and in the

capital of the kurdistan region erbil create foreign policies according to their agendas the formulation and implementation of the two governments foreign policies is to a great extent uncoordinated yet zana gulmohamad places this incoherent model of foreign policy making in the context of the country's fragmented political and social context and explains how Iraq's neighbouring countries Iran Turkey Saudi Arabia and Syria before the civil war have each influenced its internal affairs the book is the first study dedicated to the contemporary dynamics of the Iraqi state outside the usual focus on the great powers and it explains exactly how Iraqi foreign policy is managed alongside the country's economic and security interests

the publication of this collection of essays on the current crisis concerning iraq will not be welcomed by the united states government although the authors a group of german and american scholars who are moral theologicans policy analysts political scientists and a middle east historian write from divergent backgrounds and perspectives all finally concur sometimes for different reasons in rejecting the arguments of the bush administration in favor of unilateral u s military action against iraq these essays are uniformly free of the intemperate language and careless argumentation that characterizes some of the opposition to american policy inside and outside the united states and is therefore easy to dismiss whether the authors address either the threat saddam hussein represents to his reagon and the world or the prospects for alternative strategies the reasoning is generally wellinformed sensitive to complexity and attentive to detail the book will help to confirm and strengthen the growing thoughtful opposition in the united states and abroad to the bush policies and as such deserves to be taken very seriously
