for many developing countries economic growth is an elusive quest both economists and  
policy makers have long known that issues such as education investment and infrastructure  
are necessary ingredients for development and yet only a very small number of countries  
seem to be able to come up with the right mix of these ingredients bryan ritchie demonstrates  
how political relationships among government business academic and labor leaders create  
different incentives for economic actors to make key decisions to promote economic  
upgrading and sustainable development he reveals how these decisions affect matters such  
as bureaucratic structures the language of education a focus on technology and innovation  
and the inclusion of labor in business strategy these shape the institutional structures that in  
turn create the foundation of government policy the policies and the political relationships  
that form around them can be beneficial or detrimental to the economic development of the  
country this insightful study shows how the level of systemic vulnerability which is a

combination of resource endowments domestic conflict and external military security determines which forms they take systemic vulnerability and sustainable economic growth will be warmly welcomed by academics and researchers of political science economics development economics particularly and asian studies policy makers will find invaluable insights such as how government bodies can successfully incorporate actors from the private sector the book will also appeal to business leaders wishing to know why policy makers act the way they do
