while liberal democratic states like america britain and australia claim to value freedom of expression and the right to dissent they have always actually

criminalized dissent this disposition has worsened since 9 11 and the 2008 great recession this ground breaking study shows that just as dissent involves far more than protest marches so too liberal democratic states have expanded the criminalization of dissent drawing on political and social theorists like arendt bourdieu and isin the book offers a new way of thinking about politics dissent and its criminalization relationally using case studies like the occupy movement selective refusal by israeli soldiers urban squatters democratic education and violence by anti apartheid activists the book highlights the many forms dissent takes along with the many ways liberal democratic states criminalize it the book highlights the mix of fear and delusion in play when states privilege security to protect an imagined political order from difference and disagreement the book makes a major contribution to political theory legal studies and sociology linking legal political and normative studies in new ways watts shows that ultimately liberal democracies rely more on sovereignty and the capacity for coercion and declarations of legal states of exception than on liberal democratic principles in a time marked by a deepening crisis of democracy the book argues dissent is increasingly valuable

throughout the nineteenth century german philosophy was haunted by the specter of the french revolution kant hegel and their followers spent their lives wrestling with its heritage trying to imagine a specifically german path to modernity a revolution without revolution trapped in a politically ossified society german intellectuals were driven to brood over the nature of the revolutionary experience in this ambitious and original study stathis kouvelakis paints a rich panorama of the key intellectual and political figures in the effervescence of german thought before the 1848 revolutions he shows how the attempt to chart a moderate reformist path entered into crisis generating two antagonistic perspectives within the progressive currents of german society on the one side were those socialists among them moises hess and the young friedrich engels who sought to discover a principle of harmony in social relations bypassing the question of revolutionary politics on the other side the poet heinrich heine and the young karl marx developed a new perspective articulating revolutionary rupture proletarian hegemony and struggle for democracy thereby redefining the very notion of politics itself

a powerful and persuasive new reading of frost as a poet deeply engaged with both the literary and public politics of his day

why adopt a poststructural lens for the reading of the military strategy of national missile defence nmd no doubt when contemplating an attack on us territory by intercontinental ballistic missiles consulting michel foucault and critical international relations theory scholars may not seem the obvious route to take the answer to this lies in another question why has there been so much interest and continuous investment in nmd deployment when there is such ambiguity surrounding the status of threat to which it responds controversy over its technological feasibility and concern about its cost posed in this manner the question cannot be answered on its own terms the terms given in official accounts of nmd that justify the system s significance on the basis of strategic feasibility studies and conventional threat predictions guided by worst case scenarios instead this book argues that the preferences leading to nmd deployment must be understood as satisfying requirements beyond strategic approaches and issues in turning towards the interpretative modes of inquiry provided by critical social theory and poststructuralism this book contests the conventional wisdom about nmd and suggests reading the strategy in terms of us identity presented as an analysis of discourses on threats to national security around which the need for nmd deployment is predominantly framed this book is an effort to let the two fields of critical international relations theory and us foreign policy speak directly to each other it seeks to do so by showing how the concept of identity can be harnessed to an analysis of a contemporary military strategic practice
