this edited volume is based on the european law institute s project the rescue of business in insolvency law which ran from 2013 to 2016 the project sought to investigate and articulate the essential features of well functioning procedures for the rescue of distressed but viable businesses although the focus was primarily on the design and implementation of formal procedures that is those provided by law the project also required consideration of the interaction between such procedures and informal solutions to distress given the obvious cost advantages of the latter the eli project was not confined exclusively to restructurings since these are only one possible route to maximising the value of a distressed but viable business an auction procedure in which the

business is sold on a going concern basis to a new owner is one obvious alternative the eli project encompasses various aspects of both public constitutional law and insolvency law that may have a bearing on the functionality of formal restructuring procedures

is culinary art really so exact that as delia smith once wrote cooking is an exact art and not some casual game bq 2012 this exact view of cooking can be contrasted with an opposing observation by tom jaine when he argued that if cooking becomes an art form rather than a means of providing a reasonable diet then something is clearly wrong bq 2012a contrary to these opposing views and other ones as will be discussed in the book culinary art in relation to both ingredients and techniques is neither possible or impossible nor desirable or undesirable to the extent that the respective ideologues on different sides would like us to believe needless to say this challenge to the opposing views of cooking does not mean that culinary art has no practical value or that those interdisciplinary fields related to culinary art like food science nutritional economics food chemistry food aesthetics the ethics of killing for food molecular gastronomy food rheology food photography shechita the science of aphrodisiacs and so on are unimportant of course neither of these extreme views is reasonable rather this book offers an alternative better way to understand the future of culinary art especially in the dialectic context of ingredients and techniques while learning from different approaches in the literature but without favoring any one of them or integrating them since they are not necessarily compatible with each other more specifically this book offers a new theory that is the inquisitive theory of culinary art to go beyond the existing approaches in a novel way if successful this seminal project is to fundamentally change the way that we think about culinary art in relation to ingredients and techniques from the combined perspectives of the mind nature society and culture with enormous implications for the human future and what the author originally called its post human fate
