reputation is becoming an imperative business function that influences strategic decisions including the direction of a business plan and how an organization should be communicating with its stakeholders and publics it is crucial for an

organization to measure public relations outputs and outcomes as well as measuring established and developing relationships reputation management techniques in public relations is a critical scholarly resource that examines public relations strategies such as employing media plans determining communication channels setting objectives choosing the right promotional programs and message strategies budgeting and assessing the overall effectiveness of a company's public relations strategy featuring coverage on a broad range of topics such as brand and customer communications corporate social responsibility and leadership this book is geared towards practitioners professionals and scholars seeking current research on reputation management

this book focuses on an overview of the ai techniques their foundations their applications and remaining challenges and open problems many artificial intelligence ai techniques do not explain their recommendations providing natural language explanations for numerical ai recommendations is one of the main challenges of modern ai to provide such explanations a natural idea is to use techniques specifically designed to relate numerical recommendations and natural language descriptions namely fuzzy techniques this book is of interest to practitioners who want to use fuzzy techniques to make ai applications explainable to researchers who may want to extend the ideas from these papers to new application areas and to graduate students who are interested in the state of the art of fuzzy techniques and of explainable ai in short to anyone who is interested in problems involving fuzziness and ai in general

in racing toward zero the authors explore the issues inherent in developing sustainable transportation they review the types of propulsion systems and vehicle options discuss low carbon fuels and alternative energy sources and examine the role of regulation in curbing emissions all technologies have an impact on the environment from internal combustion engine vehicles to battery electric vehicles fuel cell electric vehicles and hybrids there is no silver bullet the battery electric vehicle may seem the obvious path to a sustainable carbon free transportation future but it's not the only nor necessarily the best path forward the vast majority of vehicles today use the internal combustion engine ice and this is unlikely to change anytime soon improving the ice and its fuels entering a new ice age must be a main route on the road to zero emissions how do we go green the future requires a balanced approach to transportation it's not a matter of choosing between

combustion or electrification it s combustion and electrification as the authors say the future is eclectic by harnessing the best qualities of both technologies we will be in the best position to address our transportation future as quickly as possible
